 Processes** Hajo Reijers,2003-04-07 The motivation behind the conception of this monograph was to advance scientific
 knowledge about the design and control of workflow processes A workflow process or workflow for short is a specific type of
 business process a way of organizing work and resources Workflows are commonly found within large administrative
 organizations such as banks insurance companies and governmental agencies Carrying out the tasks of a workflow in a
 particular order is required to handle one type of case Examples of cases are mortgage applications customer complaints and
 claims for unemployment benefits A workflow used in handling mortgage applications may contain tasks for recording the
 application specifying a mortgage proposal and approving the final policy The monograph concentrates on four workflow
 related issues within the area of Business Process Management the field of designing and controlling business processes The

first issue is how workflows can be adequately modeled Workflow modeling is an indispensable activity to support any reasoning about workflows Different purposes of workflow modeling can be distinguished such as system enablement by Workflow Management Systems knowledge management costing and budgeting The focus of workflow modeling in this monograph is a to support simulation and analysis of workflows and b to specify a new workflow design The main formalism used for the modeling of workflows is the Petri net Many existing notions to define several relevant properties have been adopted such as the workflow net and the soundness notion Workflow-Management mit SAP, 2002 *Workflow Handbook* 1997 Peter Lawrence, 1997
