

# CHAPTER 4

## RESEARCH METHODS

### CHAPTER OVERVIEW

This chapter outlines components of the research process in abnormal psychology. These components include the establishment of a testable hypothesis; protection of internal validity; types of research design (i.e., case study, correlational, group and single-case experimental design, genetic linkage and analysis, cross-sectional, and longitudinal designs); the role of cultural factors that impinge upon research; and research ethics. This chapter examines methods developed to discover what behaviors constitute problems, why people engage in behavioral disorders (etiology), and what constitutes effective treatments and beneficial treatment outcome.

### LEARNING OBJECTIVES

1. Describe the basic components of research, including the distinction between a hypothesis and a testable hypothesis, independent and dependent variables, internal and external validity, and statistical and clinical significance.
2. Compare and contrast different research designs (e.g., case study, correlational, group and single-case experimental designs), including the types of questions that are appropriate/inappropriate for each.
3. Explain the aims and purposes of behavioral genetics, including the advantages and disadvantages of family, adoption, twin, and genetic linkage analysis and association studies.
4. Compare and contrast the assets and liabilities of cross-sectional designs versus longitudinal designs.
5. Explain the general place of cultural and ethical principles in the research process.
6. Explain how studying behavior over time and across cultures fits within research design and the research process more generally.
7. Describe the nature and function of replication in research, and distinguish a program of research from research that is not programmatic.

*Investigation and Evaluation of the Primary Market Benchmark Syndication Process in Debt Capital Markets* Alexander Malitsky, 2017-08-21 Master s Thesis from the year 2017 in the subject Business economics Investment and Finance grade 55 The University of Liverpool language English abstract The dissertation aims to analyze the process of issuing new bonds in the EUR debt capital markets and more specifically the approach by which investment banks consort with each other syndicates to jointly execute a new issue In this thesis the aspects of fairness efficiency and regulatory implications were first analyzed from a theoretical perspective in the literature review and the information gleaned was thereafter combined with a practical view based on a survey conducted with 54 active syndicate professionals Additionally experts with more than ten years of experience were interviewed in order to enhance the reliability of the findings The outcomes therefore showcase an extensive comparison between theory and practice while also outlining prospective trends within the business of primary markets In summary this thesis reveals aspects of the syndication process as it is executed on a daily practical basis that appear contrary to a theoretical impression of efficiency and fairness However the input from current professionals highlights the immensely complex and varied applicable strategies and that many aspects must be evaluated on a case by case basis On the contrary the newly implemented regulations that shape the syndication process were determined to be unable to comply with such sophisticated requirements Thus the analysis concludes that the syndication business is self regulating by nature and that it is harmed by a lack of equal application by the investment banks within the EUR area Moreover the syndication professionals indicated a strong trend towards automation and digitalization of the process even though a more detailed investigation of this aspect showed that full exclusion of investment banks is not desirable because of a number of operational and strategic reasons

**Research Designs and Methods in Psychiatry** Maurizio Fava, Jerrold F. Rosenbaum, 1992 This important contribution to psychiatric literature coming from a group of investigators who have developed a successful clinical research unit over the last decade has the immediacy clarity and practicality expected from those who have personally wrestled with the difficult issues of design and data analysis In addition it draws upon a number of pioneers who have devised methods now used broadly in treatment research in psychiatry This amalgam presents a very informative down to earth and readable methods book that should become the standard text in this growing field of investigation The volume is divided into four sections general issues epidemiology clinical studies and psychopharmacology The material offered in the book serves both as a review for clinical researchers and as a guide to clinicians to facilitate exploration in the fields of psychopathology and treatment The path from clinical empiricism to scientific process ultimately leads to increased professional gratification and enhanced patient care

*The Impact of Leadership Styles on Organizational Effectiveness* Talha Iqbal, 2011-10 Master s Thesis from the year 2011 in the subject Business economics Business Management Corporate Governance grade A course Management Sciences language English abstract The purpose of the dissertation is to analyze the relationship between leadership styles and organizational effectiveness of IT firms in Karachi After the survey sent in the IT firm in Karachi it has been come into notice that leadership style affects the effectiveness of IT organization Four different types of leaders are found which are listed as dictator democratic visionary and free rein leader All these styles have an impact on organizational effectiveness Dictator and visionary styles influence positively whereas others negatively The visionary or transformational style yield most organizational effectiveness So this is the best style to be used The different dimensions used to define organizational effectiveness in IT industry are employee morale organizations competitive position customer satisfaction management satisfaction ability to introduce organizational change market share of the firm It is better to use transformational leadership style in most cases but sometimes autocratic style can also be used Autocratic leadership style should be used when the employee is young fresh in the industry They actually need direct guidance and concrete

explanation about task      **Development of a new competence and behaviour model for skills in working with people for project managers** Eddie Fisher,2008-06-10 Doctoral Thesis Dissertation from the year 2006 in the subject Business economics Business Management Corporate Governance The Open University Open University Milton Keynes United Kingdom language English abstract The growing penetration of projects as a way of organising work in many organisations has created a shortcoming between what companies expect in terms of project delivery and the way in which their project managers execute projects The constantly changing demands have created a need for project managers to manage the people in their projects more effectively to meet these expectations A review of the general and project management literature has revealed that a shortcoming exists and the nature of this shortcoming What used to be appropriate skills in working with people are no longer adequate now that working practices are changing in response to increases in pressures to achieve better results This thesis has developed a competence and behaviour model for skills in working with people for project managers that provides the means to fill the shortcoming The exploration to develop this model has taken place mainly through interviews with project managers from the community of practice in United Kingdom organisations supplemented by the participatory research observations of the researcher as a practising project management professional The research focus was on the impact humans make in the activities of project management within a socially constructed world The research considered competences and behaviours of skills in working with people for project managers and therefore had to deal with the meaning that people put on their observations As a consequence their descriptions have been collected analysed and interpreted by applying a constructivist interpretivist approach within a phenomenological research paradigm The results from this study are of interest to both academics and the community of practice in project management The new competence and behaviour model of skills in working with people for project managers can be incorporated in future editions of bodies of knowledge such as those promoted by the PMI APM or IPMA and other people competence models in the area of general management      Pottery Making and Communities During the 5th Millennium BCE in Fars Province, Southwestern Iran Takehiro Miki,2022-03-03 This book explores pottery making and communities during the Bakun period c 5000 4000 BCE in the Kur River Basin Fars province southwestern Iran through the analysis of ceramic materials collected at Tall e Jari A Tall e Gap and Tall e Bakun A B      *A Policy Framework for a Provincial User-centric SDI to support Land Administration in Vietnam. Case study of Vinh Long Province* Mau Duc Ngo,2017-08-30 Doctoral Thesis Dissertation from the year 2016 in the subject Sociology Habitation and Urban Sociology grade A RMIT University course PhD Geospatial Science language English abstract The government of Vietnam has received a gradually increasing number of complaints and disputes regarding land administration issues Significant resources have been invested in related work including data collection policy reforms and technology for land administration However there has been very little work directed to policy development for a data sharing framework This thesis argues for the development of an Spatial Data Infrastructure Land SDI

by initially proposing a policy framework as the foundation for such an infrastructure The present research employs a multi method approach with a case study strategy to investigate the problems and issues in land administration and the requirements for an SDI to support land administration at the provincial level in Vietnam The thesis presents a case study based in Vinh Long a southern province of Vietnam and draws on this to propose an appropriate policy framework for a user centric SDI to support land administration at the provincial level The stakeholder consultations included in depth interviews with central and local stakeholders focus group discussions and a survey by questionnaire of people at the grassroots level of land users

An investigation of the effectiveness of social media marketing on the marketing performance of Selected Higher Education Institutions in Zambia Francis Mukosa,2022-10-12 Doctoral Thesis Dissertation from the year 2022 in the subject Communications Public Relations Advertising Marketing Social Media grade Pass course Marketing language English abstract HEIs in Zambia have adopted the use of social media in advertising online learning and also for administrative purposes Social media has developed in the recent years to a level where it presents itself as the biggest virtual market with the potential to increase geographic markets and revenue for organizations While cases of HEIs that have used social media marketing for purposes of marketing exist in other places there is no significant research in the Zambian environment that shows empirical evidence that the use of social media marketing can impact marketing performance in HEIs The purpose of this study is to investigate the effectiveness of social media marketing on marketing performance in HEIs and the findings are meant to build a model for social media marketing for HEIs in Zambia in see figure 5 2 in Chapter 5 Data in this research was collected from twelve HEIs using both qualitative and quantitative research methods since this research is a mixed research with both deductive and inductive arguments The data collection techniques included a semi structured interview for qualitative data and a semi structured questionnaire for the quantitative data Data analysis was carried out using different techniques in SPSS for the quantitative data and content analysis using Google analytics for the qualitative data The implications of the findings in chapter four mean that HEIs in Zambia must begin to use social media not only for administrative or advertising purposes but they must use it effectively as a tool to increase their market share and increase their revenue The findings and data analysis in this research indicated that social media is effective in marketing HEIs in Zambia however these institutions must adopt the suggested model in Figure 5 2 in Chapter 5 if they are to enhance social media performance for marketing

A Hypothetical Enhanced Renewable Energy Utilization (EREU) Model for Electricity Generation in Thailand Thomas Andexer,2008 Master s Thesis from the year 2008 in the subject Environmental Sciences grade Passed Assumption University of Thailand College of Internet Distance Education CIDE School of Business Administration course Master Thesis Project 100 entries in the bibliography language English abstract This thesis presents a research project entitled A Hypothetical Enhanced Renewable Energy Utilization EREU Model for Electricity Generation in Thailand This research is motivated by Thailand s rapidly increasing electricity consumption caused by the country s long

standing above average economic growth. Consequently, the rising electricity demand can only be satisfied by continuously growing electricity imports and thus creating a significant burden to Thailand's national budget. Furthermore, Thailand is heavily dependent on natural gas reserves for electricity generation; however, these are expected to be depleted within only three decades, and global price levels for conventional fuels are increasingly volatile with an ascending tendency as well. Therefore, Thailand faces an urgent need to strategically plan for the broad utilization of domestic renewable energy resources, which is essential for a more diversified and thus sustainable electricity generation, as well as for the nation's endeavor to become an energy hub within the South East Asian region. Under these circumstances, this research conducts a comprehensive literature review regarding the past development as well as the current situation of renewable energy utilization in Thailand, which concludes in the identification of the importance of renewable energy in the given context and closes with both a distinctive need assessment and a conceptual framework for Thailand's future renewable energy strategy. Subsequently, the research introduces a unique primary research endeavor in the form of an explorative expert interview survey, which succeeds in a substantial collection of qualitative and in-depth data.

**Developing a Grounded Theory of Leadership for Performance Excellence in Higher and Postsecondary Education** Vicki J. Martin, 2002. *Potential reduction of corporate travel expenditures*. Benjamin Heselhaus, 2010-03-29. Bachelor Thesis from the year 2009 in the subject Tourism Miscellaneous grade 2.0 International University of Applied Sciences, language English, abstract. This bachelor thesis is concerned with the cost reduction potential of travel management tools with regard to business travel expenditures in micro, small, and medium-sized enterprises. For this purpose, primary research in the form of a questionnaire was conducted. The results, which are presented at the end of the thesis, reveal that travel management tools are on the spot for micro, small, and medium-sized enterprises, but by far not as much that one could say the market is saturated, since 29 percent of the companies are currently applying travel management tools, but more than half of them have not yet thought about the matter. The findings also show that corporate credit cards and online booking engines are by far the most popular tools, and that travel policies and online booking engines are the most efficient tools for micro, small, and medium-sized enterprises with respect to their corresponding cost-saving potential.
