Federal Cloud Computing Strategy The White The White House,2011-02-08 The Federal Government s current Information Technology IT environment is characterized by low asset utilization a fragmented demand for resources duplicative systems environments which are difficult to manage and long procurement lead times These inefficiencies negatively impact the Federal Government s ability to serve the American public Cloud computing has the potential to play a major part in addressing these inefficiencies and improving government service delivery The cloud computing model can significantly help agencies grappling with the need to provide highly reliable innovative services quickly despite resource constraints Why buy a book you can download for free We print this book so you don t have to First you gotta find a good clean legible copy and make sure it s the latest version not always easy Some documents found on the web are missing some
