Sustainable broiler production in North Macedonia - A value chain guide to best practice Food and Agriculture Organization of the United Nations, 2019-12-18 The Sustainable Broiler Production in North Macedonia A Value Chain Guide to Best Practice is to enhance the development of a sustainable broiler meat industry in North Macedonia so as to deliver a high quality product that can compete directly with the current high volume of imported product This Guide is a tool that supports the FAO mission to advance track record of efficiency gains and better environmental stewardship Broiler growers integrators processors suppliers food service companies retailers and outside stakeholders realise the importance of working together to collaborate on the shared goals of implementing best practices tracking progress and continuing to drive continuous improvement through the creation of the Guide including the best management practices as outlined in this document The Guide is a tool to support and communicate continuous improvement in sustainability through leadership innovation multi stakeholder engagement and collaboration It successfully aggregates a list of best management practices that could be utilised on farms hatcheries and processing operations both today and into the future It also incorporates the important function of maintaining the highest achievable standards for welfare and food safety The Guide has been developed by FAO and the Faculty of Agricultural Sciences and Food of the Republic of North Macedonia It is expected that this publication will serve as a practical guide providing valuable information to both experienced and novice poultry producers alike as well as for students researchers

Commercial Chicken Meat and Egg Production Donald D. Bell, William D. Weaver, 2012-12-06 Commercial Chicken Meat and Egg Production is the 5th edition of a highly successful book first authored by Dr Mack O North in 1972 updated in 1978 and 1984 The 4th edition was co authored with Donald D Bell in 1990 The book has achieved international success as a reference for students and commercial poultry and egg producers in every major poultry producing country in the world The 5th edition is essential reading for students preparing to enter the poultry industry for owners and managers of existing poultry companies and for scientists who need a major source of scientifically based material on poultry management In earlier editions the authors emphasized the chicken and its management The 5th edition with the emphasis shifted to the commercial business of managing poultry contains over 75% new material The contributions of 14 new authors make this new edition the most comprehensive such book available Since extensive references are made to the international aspects of poultry management all data are presented in both the Imperial and Metric form Over 300 tables and 250 photos and figures support 62 chapters of text New areas include processing of poultry and eggs with thorough discussions of food safety and further processing The business of maintaining poultry is discussed in chapters on economics model production firms the use of computers and record keeping Updated topics include breeders and hatchery operations broiler and layer flock management replacement programs and management of replacements nutrition and flock health New chapters address flock behavior ventilation waste management egg quality and

egg breakage Other new features include a list of more than 400 references and a Master List of the tables figures manufacturers of equipment and supplies research institutions books and periodicals breeders and trade associations Commercial growers will find the tables of data of particular interest scientists will be able to utilize the extensive references and to relate their areas of interest to the commercial industry s applications and students will find that the division of the book into 11 distinct sections with multiple chapters in each will make the text especially useful

The effect of muscle pathogenesis on avian physiology, animal welfare, and quality of muscle as a food Wei Guo,Sandra G. Velleman,Gale M. Strasburg,2025-05-15 Over the past several decades the poultry industry has achieved huge improvements in global poultry production including with increased growth performance improved body composition higher market weight increased feed efficiency reduced production costs and increased profitability for growers These gains have resulted from a combination of intensive genetic selection tailored nutritional approaches and novel poultry management strategies However these improvements in broiler chicken and turkey production have also come with costs These costs include increased susceptibility to environmental stress increased mortality in commercial poultry flocks and muscle pathogenesis ultimately leading to deleterious effects on meat quality traits affecting appearance texture and protein functionality For example a subset of fast growing domestic turkeys develops spontaneous cardiomyopathy or round heart disease that leads to a mortality rate up to 15% at 2 to 4 weeks of age Even turkeys that survive the critical first two weeks after hatch already have damaged hearts at a prevalence of 80% to 90% which may lead to growth retardation during the grow out phase This syndrome can also occur in broiler chickens which causes major economic losses and limits the maximum profitability in the poultry industry world wide Another example is wooden breast an abnormal muscle condition resulting in a hardening of the breast muscle affecting meat texture Other examples include green muscle disease also known as deep pectoral muscle myopathy spaghetti meat and white striping All of these pathologies include the development of myopathic changes subsequently affecting meat quality leading to consumer complaints and economic losses by the processing industry There is a paucity of information on the etiologies of broiler and turkey muscle pathogenesis and their consequent effects on muscle physiology This Research Topic will highlight the mechanisms of skeletal and cardiac muscle pathogenesis in poultry that are responsible for premature bird mortality and altered quality of muscle as a food This research topic will cover the recent findings in the area of myopathies in poultry Original Research and Review papers among other article types are welcome to be submitted to this collection
