*Innovations in Educational Change* David Hung,Shu-Shing Lee,Yancy Toh,Azilawati Jamaludin,Longkai Wu,2019-08-07

This book offers an ecological perspective to understand the opportunities and complexities of spreading and sustaining educational innovations It explores the imperatives underpinning educational reforms and identifies the role of schools in developing disseminating and sustaining changes in Singapore s educational context It also includes international case studies that examine the dialectical relationships between structure people and culture and demonstrate that cultivating ecologies involves leveraging affordances and resources across the education system to create new contexts synergies and capacities Further it argues that educational innovations and reforms also need to consider tacit knowledge and conditions of transfer which may be ambiguous and challenging Few books address the nuances and interactions of innovation and change across levels of the education ecology from the micro classroom meso organisation school exo partners macro policy and chrono time scales levels The ecological perspective adopted in this book explores the dynamic tensions in order to understand the interplays of policy and school level influences that contextualize school innovations By presenting multiple voices and views it allows impediments and affordances of innovation diffusion to be discussed holistically which is an integral caveat for nurturing a sustainable ecology that enables innovations      *The Chautauquan* Theodore L.
