Managing Knowledge, Absorptive Capacity And Innovation Joe Tidd,2021-05-05 Knowledge Management focuses on identifying sharing storing and exploiting internal knowledge whereas Open Innovation is more concerned with sources of external knowledge However this simple dichotomy between open and closed approaches is unhelpful and not realistic Instead it is the interaction between internal and external knowledge that creates dynamic capabilities and the ability to innovate In particular we need to better understand the interactions between internal and external knowledge and how these influence innovation outcomes under different conditions This edited volume *Managing Knowledge Absorptive Capacity and Innovation* provides an opportunity to combine contemporary interests in Open Innovation with the classic notion of absorptive capacity to better understand how organisations can manage the absorption and exploitation of inbound external sources of knowledge in order to innovate

Innovative and Creative Behaviours in the Modern

Workplace: Causes and Consequences Mike James Mustafa, Mathew Hughes, Delia Virga, 2025-08-22 In light of ongoing globalization and the post pandemic recovery period organizational innovativeness is becoming a strategic necessity for many organizations to survive and thrive in contemporary business environments In achieving innovativeness organizations have become reliant on the discretionary and non conformity extra role behaviors of their employees that go beyond employee role expectations Employee creativity and innovativeness represent two such behaviors deemed critical for organizational innovativeness Employee creativity can be viewed as the cognitive and behavioral processes applied when attempting to generate novel ideas and employee innovativeness as the processes applied when attempting to implement new ideas A particular challenge for organizations is understanding how behaviors emerge and how they can be sustained through appropriate structures and processes Such challenges are even more profound given that employees may not be willing to engage in such behaviors due to often significant personal costs associated with engaging in them Given the growing importance of employee creative and innovative behaviors to organizational success and survival numerous studies have examined their antecedents in order to develop theoretical models and evidence based guidance for enhancing employee creativity and innovativeness A fundamental issue among such studies is that they have mainly focused on specific elements of organizational cultures and or leadership styles This has often resulted in an incomplete understanding of how such complex behaviors actually emerge
