Ambient Intelligence AmI is a recent paradigm emerging from Artificial Intelligence in which computers are used as proactive tools to assist people with their day to day activities making their lives more comfortable Another main goal of AmI originates from the human computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user friendly interfaces This field is evolving quickly as can be witnessed by the emerging natural language based and gesture based types of interaction The inclusion of computational power and communication technologies in everyday objects is growing and their embeddedness in our environments should be as invisible as possible In order for AmI to be successful human interaction with computing power and embedded systems in the surroundings should be smooth and take place without people actually noticing it The only things people should notice in connection with AmI are more safety comfort and wellbeing emerging in a natural and inherent way ISAmI is the International Symposium on Ambient Intelligence and aims to bring together researchers from the various disciplines that constitute the scientific field of Ambient Intelligence to present and discuss the latest results new ideas projects and lessons learned especially in terms of software and applications

*Edge-of-Things in Personalized Healthcare Support Systems* Rajeswari Sridhar, G. R. Gangadharan, Michael Sheng, Rajan Shankaran, 2022-06-19 Edge of Things in Personalized Healthcare Support Systems discusses and explores state of the art technology developments in storage and sharing of personal healthcare records in a secure manner that is globally distributed to incorporate best healthcare practices The book presents research into the identification of specialization and expertise among healthcare professionals the sharing of records over the cloud access controls and rights of shared documents document privacy as well as edge computing techniques which help to identify causes and develop treatments for human disease The book aims to advance personal healthcare medical diagnosis and treatment by applying IoT cloud and edge computing technologies in association with effective data analytics Provides an in depth analysis of how to model and design applications for state of the art healthcare systems Discusses and explores the social impact of the intertwined use of emerging IT technologies for healthcare Covers system design and software building principles for healthcare using IoT cloud and edge computing technologies with the support of effective and efficient data analytics strategies Explores the latest algorithms using machine and deep learning in the areas of cloud edge computing IoT and healthcare analytics
