Science & Medicine ,2002 Advanced Practice in Oncology Nursing Esther Muscari Lin,Oncology Nursing Society,2001 This indispensable book of exercises from the ONS helps users assess and develop the core knowledge necessary for AOCN certification Content and organization is based on a blueprint of the actual AOCN exam and covers all role components Case studies with real life oncology situations multiple question formats and rationales help sharpen critical thinking skills essential to top performance the AOCN exam or gaining recertification An Oncologic Emergencies section covers 10 specific emergency cases *Cancer Forum* ,2002 **Advanced and Critical Care Oncology Nursing** Cynthia C. Chernecky,Barbara J. Berger,1998 This 1998 AJN Book of the Year presents unique coverage of the nursing care associated with over 40 of the most common oncologic emergencies Each chapter follows a consistent format to facilitate reference and includes a focused assessment table patient family teaching guidelines and review questions Differential Diagnosis Mnemonics Thomas J. Donnelly,Christopher C. Giza,2001 This entertaining and highly useful book presents hundreds of easy to remember mnemonics as a means of learning and then recalling the differential diagnosis possibilities

for a wide range of medical conditions The text is organized by body system and each set of mnemonics is accompanied by notes for fine tuning the diagnostic process The mnemonics included range in length from short to very long depending on the clinical entity Sometimes more than one has been added for brevity or organizational reasons Mnemonics presented provide simple frameworks on which to construct differential diagnoses Mnemonics included are concise pertinent words or phrases constructed to reflect the pathogenesis of the problem Others are simple words that help in remembering a list of possibilities An explanatory section is included with each mnemonic to review pathogenesis or provide helpful information Enhances the readers thoroughness in making evaluations so that diagnoses are not missed Serves as a handy reference for making diagnoses when particular problems arise

Critical Care Nursing Patricia Gonce Morton,1998 This book is organized into five parts the first two of which cover areas applicable to all critical care patients including the patient s and family s experience education pain management ethical and legal issues and the rewards and challenges of critical care nursing The third part addresses specific populations including pediatric patients pregnant women older adults and postanesthesia patients as well as interfacility transport The balance of the book is arranged by body systems and concludes with multisystem problems This is the seventh edition of a text first published in 1973 and last published in 1994 The purpose is to present current comprehensive and practical information built on a holistic perspective of care in which the patient is the core of nursing practice This book meets a need for educating students and nurses in the critical care environment The editors objective of providing a framework for focusing on patient responses in the critical care environment is met This book is intended for students in critical care educators and clinicians This edition is also tailored to meet the needs of patients The editors are excellent authorities in critical care nursing All three are practitioners and one is both practitioner and educator The contributors and reviewers are critical care experts The illustrations are used best to understand critical care technology The graphics used for anatomy physiology and patient assessment add to the usefulness of the text The references are pertinent and current but certain specialty content would need to be updated by the reader e g medication protocols for CHF The use of color in the text is managed carefully to guide and not overpower the reader The 1997 ACLS Guidelines are in Appendix 1 The Answer Key to Study Questions appears in Appendix 2 Anatomy and physiology patient assessment and clinical management nursing research collaborative plans of care teaching and home care issues are some of the innovations presented One strength of book is how it addresses the changes associated with aging and the needs of the older adult Aging concerns are covered in one chapter and are highlighted throughout the text This edition provides current information that makes the previous edition out of date I would recommend this text for beginning critical care nurses and for undergraduate nursing students for its coverage of advanced pathophysiological concepts
