The British National Bibliography Arthur James Wells,1996 Proving in the Elementary Mathematics Classroom
Andreas J. Stylianides,2016 Although proving is core to mathematics as a sense making activity it currently has a marginal place in elementary classrooms internationally Blending research with practical perspectives this book addresses what it would take to elevate the place of proving at elementary school The book uses classroom episodes from two countries to examine different kinds of proving tasks and the proving activity they can generate in the elementary classroom It examines further the role of teachers in mediating the relationship between proving tasks and proving activity including major mathematical and pedagogical issues that arise for teachers as they implement each kind of proving task In addition to its contribution to research knowledge the book has important implications for teaching curricular resources and teacher education Essential Mathematics for the Australian Curriculum Year 8 David Greenwood,Bryn Humberstone,Justin Robinson,Jenny Goodman,Jenny Vaughan,Franca Frank,2011-02-04 Essential Mathematics for the Australian Curriculum provides an authoritative and practical interpretation of all content strands substrands and content descriptions **B.H.
