Math for Carpentry and Construction Richard B. Miles, 2018-01-16 Math for Carpentry and Construction is a combination text and workbook designed to help carpentry and construction students learn and apply basic math skills The basic concept behind each math operation is explained at the opening of the unit Next students are given clear instruction for performing the operation Each unit includes a variety of carpentry and construction related practice problems to reinforce what the students have learned The practice problems are identical to the types of problems the students will be required to solve in a carpentry shop or on a construction site In addition to teaching basic math concepts the problems give students a preview of the types of challenges they will face in a work environment This helps the students develop solid troubleshooting skills that will serve them throughout their careers as carpenters and builders Problems range in complexity from solving simple equations to using the Pythagorean Theorem Math Tips underscore important points and provide additional easy to understand examples Answers to odd numbered practice problems are provided in the back of the book

Practical Problems in Mathematics for Carpenters Harry C. Huth, 1984 The Practical Problems in Mathematics series offers students of specific trades useful help in basic mathematics and opportunities to practice math principles on problems applied to their area of interest Practical Problems in Mathematics for Carpenters seventh edition contains 43 instructional units progressing from the simplest basic arithmetic operations to compound problems applied in light frame construction Each of the 43 units begins with a brief review of the math principal to be applied in that unit The book contains more than 800 carpentry problems including two comprehensive tests
