professionals perceive a Cloud as an unlimited on demand flexible computing fabric that is always available to support their needs. Cloud users experience Cloud services as virtual off premise applications provided by Cloud service providers. To an end user a provider offering a set of services or applications in the Cloud can manage these offerings remotely. Despite these discrepancies there is a general consensus that Cloud Computing includes technology that uses the Internet and collaborated servers to integrate data applications and computing resources. With proper Cloud access such technology allows consumers and businesses to access their personal files on any computer without having to install special tools. Cloud Computing facilitates efficient operations and management of computing technologies by federating storage memory processing and bandwidth.
