The Agile Imperative Sabine Pfeiffer, Manuel Nicklich, Stefan Sauer, 2021-07-30 In an ever changing working environment customer and workplace demands have brought new challenges to how we organize and manage work Increasingly this is addressed by the idea of agility From its beginning agile work has claimed to be a radically different approach which allows organisations to react flexibly to changing environmental demands whilst also offering a people centered approach to management While the literature often examines agile instruments from a business perspective this edited collection advances the discussion of the efficacy of agile working by applying a more critical social science perspective The chapters scrutinize whether agility is just a discursive imperative or whether it is in fact a genuine organizational and institutional strategy that is meant to better deal with complexity and volatility The answers to these

questions can vary at different levels and the editors therefore examine agility at the level of teams organizations and societies By assembling different perspectives on the sustainability and virtue of agile instruments and by bringing together international scholars from a variety of disciplines the project stimulates a comparative discussion **Uniting Knowledge Integrated Scientific Research For Global Development** Seven editora, **Documentation for the Illinois Lands Unsuitable for Mining Program** ,1987 *Computer Confluence* George Beekman,Michael Jay Quinn,2005 Computer Confluenceis more than a book it s the confluence of three media resources an illustrated textbook a state of the art CD ROM and up to the minute web site Computer Confluencegoes beyond computer concepts and explores the promise and problems of information technology how it affects people and society and the future Since 1994 thousands of students have been introduced to computers through the authors unique approach After an illustrative introductory chapter on computer basics the book covers such topics as hardware and software basics graphics digital media and software media networking and telecommunication security and risks and the internet and world wide web An excellent reference resource for anyone interested in computers and computer concepts **Documentation Abstracts** ,2002 **Whole Effluent Toxicity Program Guidance Document** ,1996 *Documentation politique internationale* ,2003 *Annuaire de documentation coloniale comparée* ,1928 **Library Science with a Slant to Documentation and Information Studies** ,1988 **Library Science with a Slant to Documentation** ,1992 **The British Library General Catalogue of Printed Books to 1975** British Library,1986 **International Labour Documentation** International Labour Office. Roberts,2008 The last half century has seen many studies of the origin of the English village As a cross disciplinary enquiry this book integrates materials from geography history economic history archaeology place name studies anthropology and even church architecture These provide varied foundations but the underlying subject matter always engages with landscape studies Beginning with a rigorous examination of evidence hidden within the surviving village and hamlet plans seen on eighteenth and nineteenth century maps the first half of the book shows how these can be classified mapped analysed and then interpreted as important parts of former medieval landscapes Many specific case studies are built into the argument all being drawn from the author s lifetime work on northern England and accessible language is employed From this base the argument develops with the objective of integrating landscape studies with the descriptive and analytical practices of history and drawing these together by using the cartographic methods of historical geography This foundation leads gently into deeper waters to the landed estates in which all settlements developed and the farming and social systems of which they were a part to the land holding arrangements that were integrated into the physical plans providing methods of sharing out the agricultural resources of arable meadow woodland and common grazings and finally to the social divisions present within a changing society A wholly new theme is found in the argument that certain types of land tenure were

associated with a class of officer land agent or dreng who in northern England was often linked with the provision of tenants for new villages. It is clear from the evidence amassed that the deliberate founding of new villages and the establishment of new plans on older sites was taking place in the centuries between about AD 900 and 1250. Finally the study moves beyond the North of England to review the European roots of planned villages and hamlets and concludes with a challenging hypothesis about their origin in the whole of England. This provides pointers towards future enquiry. International Labour Documentation International Labour Office, Central Library and Documentation Branch, 1965
