Many Layers of Ecocentrism Abhik Gupta,2024-06-17 This book unveils the myriad streams of ecocentric thoughts that have been flowing through the human mind in indigenous communities in the wisdom of philosophers in the creative expressions of poets and writers sometimes latent but sometimes more explicit The strength of this book lies in the fact that it attempts to show that ecocentrism had not emerged suddenly as a distinct line of philosophical thought or found its place among the various normative approaches toward nature but the seeds of ecocentrism had always been running through human societies Thus this book not only emphasizes the unity of life but also reveals the inherent unity of all hues of ecocentrism The book adopts a multidisciplinary approach which is essential to dwell on a topic like ecocentrism which permeates the domains of disciplines as disparate as science philosophy religion normative ethics myths and folklore poetry and literature among others Despite this eclectic approach the book attempts to maintain continuity among the chapters and present these concepts in a simple form that will be easily accessible by readers from all conceivable backgrounds This book would be useful to the students researchers and faculty from the fields of ecology and environmental science philosophy sociology religious studies and literature It will also be an indispensable companion for all nature lovers activists and general readers interested in the emergence and evolution of environmental thoughts **Principles of Animal Physiology**

Moyes,2007-09 Ethical Issues in Psychology Philip Banyard,Cara Flanagan,2013-03-01 How do we know right from wrong good from bad help from hindrance and how can we judge the behaviour of others Ethics are the rules and guidelines that we use to make such judgements Often there are no clear answers which make this subject both interesting and potentially frustrating In this book the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology There are many psychological studies that appear to have been harmful or cruel to the people or animals that took part in them For example memory researchers carried out studies on a man who had no memory for over forty years but because he had no memory he was never able to agree to the studies Is this a reasonable thing to do to someone Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by

keeping them in social isolation Is this a reasonable thing to do even if we find out useful things about human distress If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government would you do it If so why If not why not These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas This book uses examples from psychological research to look at key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research This book is essential reading for undergraduate and pre undergraduate students of psychology and related subjects such as philosophy and social policy
