

# Introduction

Fish that are native and can be located in a specific geographical area or ecosystem are referred to as indigenous fish species. India is home to a diverse range of indigenous ornamental fish species, with over 195 varieties reported from the North-East Region alone. Some of the important varieties include *Chanda nama*, *Puntius arulius*, *Poethia conchonius* etc. These ornamental fish species play a vital role in the Indian economy. They are used to decorate ponds and aquariums, and are also exported to other countries. Additionally, these species provide an important source of income for local communities, especially those living in rural areas.
