Political, Social, Religious and Economic Challenges in the Middle East and North Africa Flavia Cortelezzi, Alessandro Ferrari, Jinan Limam, 2025-12-23
A decade after the Arab springs the book aims to provide a concise perspective on the political social and economic challenges of the southern shore of the Mediterranean a decade after the Arab springs
The volume both from a sociolegal and economic perspective aims to offer readers an analytical and up to date picture of the transformations in several particularly significant countries in the area under consideration
The volume thus covers the entire north African and near Eastern coastal belt from Morocco to Lebanon and extends its focus into the Gulf
In particular keeping in the background the Agenda 2020 2030 the book explores on the one side the role of the religious factor in the transformation of the constitutional orders and on the other the perspectives of economies of MENA region in the decade that followed the Arab springs
In a different way the Arab springs were characterized from a constitutional point of view by the attempt at a different relationship between political power and religion
This new arrangement particularly evident in the Tunisian Constitution but not absent in other contemporary experiences was associated with favorable and expanding economic prospects
The book questions the relevance of this reading and how economic and political factors affected subsequent transformations
The situation of each country is individual in that it differs depending on many factors starting with historical and geographical factors that have profoundly influenced social political and economic structures
What is to be expected for the MENA region in the light of Agenda 2020 2030
Which are the major opportunities for growth and reform and which are the main risks
By adopting a multidisciplinary approach this book will offer a comprehensive picture of the main political and economic challenges for MENA region
