Fundamentals of Philosophy John Shand, 2003 A comprehensive and accessible introduction to the major topics in philosophy designed to be used as a companion to any undergraduate philosophy course

Aristotle and Tragic Temporality Sean D. Kirkland, 2025-02-28 Aristotle and Tragic Temporality treats a theme that has drawn scholarly attention for millennia Aristotle on time and our experience of it It does so however in a wholly unprecedented way grounding its interpretation in his Poetics and Ethics rather than the natural philosophy of the Physics Sean D Kirkland first takes up Aristotle's discussion of our tragic temporal situatedness our having to act think and live always between a determining past we can never fully master and a projected future we can never fully anticipate It is this condition that comes powerfully to light for Aristotle on stage in the performance of a tragic drama The familiar Aristotelian virtue ethics then becomes something radically new in the transforming light of the Poetics temporality an outline of how humans can inhabit that irremediably tragic condition never overcoming or suspending it and arrive nonetheless at something like happiness and excellence

The Poetic Imagination in Heidegger and Schelling Christopher Yates, 2013-08-15 By investigating the importance of the imagination in the thought of Schelling and Heidegger Yates's study argues that Heidegger's later more poetic philosophy cannot be understood properly without appreciating Schelling's central importance for him

The Love of Wisdom Andrew Davison, 2013-10-31 From the dawn of Western thought to the present day The Love of Wisdom tells the story of philosophy as something intensely theological both in its insights and its wrong turns The book will be invaluable for any student of theology or intellectual history and for anyone who wants to see the intellectual cogency of the Christian faith at its best The intellectual tradition of the Church emerges clearly from this book as one of the glories of the Christian inheritance Andrew Davison argues that Christian thinkers will be more faithful to Christian teaching not less if they pay attention to philosophy Our thinking is always philosophical since we cannot think without categories or assumption Our philosophy may as well therefore be good philosophy By bringing our philosophy out into the open we can bring them under theological judgement Clear and articulate this book provides the philosophical background to Christian theology down the ages and examines the intellectual climate of our own times

[Catechesis for the New Evangelization](#) Brian Pedraza, 2020-06-12 Popes Francis Benedict XVI and John Paul II have called the present a time of New Evangelization for the Church and have stressed the importance of catechesis for this mission John Paul II claimed that this renewal of the Church's mission is grounded in the teachings of the Second Vatican Council Nevertheless

approaches to catechesis in the conciliar and postconciliar era have varied greatly as evidenced by the shifts in catechetical practice effected by the modern catechetical movement Just as the dominant forms of theology changed from neo scholastic to anthropological approaches so too did catechesis move from catechism based approaches to more anthropological models based upon human experience In light of this context Catechesis for the New Evangelization examines the theological foundations of catechesis in the Church s understanding of divine revelation and its reception by the human person especially as found in the conciliar constitutions Dei Verbum and Gaudium et Spes After drawing norms on divine revelation from these documents it traces the history of the modern catechetical movement in order to compare this history with the conciliar norms highlighting the renewal s strengths and weaknesses These steps prepare the way for the main part of the book an examination of the anthropology of Karol Wojty a Pope John Paul II Ultimately his anthropology provides an understanding of the person that can unite divine revelation and human experience in a way that takes what is best from the modern catechetical movement while developing the ministry in a way that can be fruitful for the New Evangelization Pedraza s book is not only an incisive look at modern catechetical history and theory It also touches upon some of the most important theological topics of the past century including the neo scholastic crisis the proper interpretation of the Council the relationship of nature and grace and the modern understanding of the imago dei with the research and competency appropriate for scholarly interest and the accessibility needed for educated practitioners in catechesis
