

API Recommended Practice 2D

Operation and Maintenance of Offshore Cranes

SEVENTH EDITION (REVISION 2014) 1201-0001-2014-01 PRODUCT NO. 940007

This recommended practice addresses general principles for the safe installation and maintenance of offshore production-related lifting systems on fixed or floating offshore platforms, offshore support vessels, jack-up drilling rigs, semi-submersible drilling rigs and other types of mobile offshore drilling units (MODUs). This document also provides recommendations and instructions for personnel working on cranes, crane operations and testing of hoisting cranes that are installed offshore.

These requirements are unique, but are not limited to the following:

- 1) Crane and equipment and production applications. These cranes are typically mounted on a fixed structure, derrick, structure, floating platform, structure, or ship-based crane used in drilling and production operations for offshore markets and usage.
- 2) Offshore applications. These lifting devices (rated for 20,000 lbs (9072 kg) or more) are mounted on structures where wind and sea state is more frequently encountered. Other design loads include surface currents, and other materials are less common. Some vessels, for example, are 60, 80 and 100 ft (18, 24 and 30 m) long.
- 3) Hoisting applications. Cranes for hoisting applications are installed on decks, not-enclosed areas or other vessels, and are used in construction and energy operations above and below the sea surface.

Equipment as a result of such factors used here for hoisting offshore operations (the loads on the deck and not included in the code of the manufacturer practice)

Lifting devices not covered by this document should be applied, installed and maintained in accordance with the manufacturer's recommendations.
