An Application of AHP to Developing Weights for

Hierarchical Criteria System of ASP Vendor Selection □□□, 2005 **Uses and Limitations of the AHP Method**

Nolberto Munier, Eloy Hontoria, 2021-02-05 This book examines the Analytical Hierarchy Process AHP method its varied uses as well as its limitations for solving real world scenarios While the simplicity of the method compels users to find shortcuts to a real world problem it also leads to obtaining wrong results that do not represent reality By alerting practitioners about the core necessities of a new scenario this book helps solve this problem as well as contribute to the field of Multicriteria Decision Making Method MDCM The authors use a demonstrative rather than a theoretical approach and examine 30 subjects that displays the shortcomings and drawbacks of the AHP Each one is examined in depth discussed debated and reasoned using examples some of them numeric The book highlights the rationality and common sense of the subjects and in most cases validates the criticism by showing through numerical examples the impossibility of the AHP method to address let alone solve real world projects At the conclusion of each subject a table is built comparing the similarities and differences between the opinions of the authors and other experts along with the respective pros and cons [Hierarchon Vol 2](#) Thomas L. Saaty, Rafikul Islam, 2015-08-18 Researchers have been continually developing ways and means to improve quality in decision making The success of a methodology is judged by its acceptability by the decision makers In this context it is beyond any argument that AHP has been massively successful Readers of this volume will see once again that AHP has been applied in widely diverse areas However there are many more applications of AHP in other areas that are not reported here We also don't claim that the set of applications of AHP in the reported areas is exhaustive it is far from complete In fact it will not be possible to capture all the real world applications of AHP even by publishing many volumes of this kind We hope that the readers will find the present compilation useful *AHP Model for Identifying Best Health Care Establishment*

Mohammed Azam, M. N. Qureshi, Faisal Talib, 2016 The purpose of this study is to develop an analytic hierarchy process AHP

model utilizing components parameters and factors of a specifically designed Integrated Quality Model for Health Care Establishment HCE In doing so the authors have utilized AHP approach to identify the best health care service quality performer among alternatives of HCEs To select the best HCE three HCEs of North India namely HCE A HCE B and HCE C were chosen The criteria components of the integrated quality model for the HCE designed and suggested by Azam Rahman Talib 2012a and Azam Rahman Talib Singh 2012b were adopted Further this study has undertaken an extensive in depth literature review about AHP and its applications for HCEs from various aspects A specifically developed integrated quality model for HCE with its components parameters factors thereof duly coded as criteria and sub criteria have been utilized It thus facilitates the development of an AHP model to rank the chosen HCEs helping to identify potentially the best HCE among them On the basis of the proposed hierarchical model the findings suggest that the HCE A may be selected first followed by HCE C and HCE B based on overall rating The study provides a mechanism through AHP model to select potentially best HCE utilizing specifically developed integrated quality model for HCE with impacts both for the clients and the patients to enjoy the service of best HCE as well as for the managers to improve the services of HCE and the business The study thus adds a new perspective by developing a selection process to select the best HCE through an AHP model utilizing criteria and sub criteria of an integrated quality model specifically developed for HCE It has practical value for maintaining service quality of HCE to benefit the clients and related stakeholders as well as the managers by improving quality enhancing reputation and business thereof
