Library, Institute of Chartered Accountants in England and Wales, 1971      From Product Description to Cost: A Practical Approach Pierre Marie Maurice Foussier, 2006-04-04 Parametric cost estimating when properly used is a powerful and cost effective technique Unfortunately it is often misunderstood and rejected by many potential users for whom it could be a beneficial tool An agreement on how to use it and how to recognise its limitations is a major benefit to the cost estimating community This book presents ways of parametrically forecasting costs and their advantages and disadvantages with examples from the mechanical software and building industries and discusses most of the mathematical procedures useful for parametrically forecasting costs Introduces the judgement needed to audit the ways these techniques are used firstly as a process and secondly as a tool to generate estimates In Volume 1 The Parametric Approach cost estimating is introduced the preparation of data before utilization is

discussed the basic concepts of general cost estimating models are examined the use of cost models is considered and finally risk analysis is introduced

**From Product Description to Cost: A Practical Approach** Pierre Foussier, 2006 Annotation Parametric cost estimating when properly used is a very powerful and cost effective technique Unfortunately this technique is often misunderstood and rejected by many potential users for whom it could be a beneficial tool The development of an agreement on how to use it and how to recognise its limitations is a major benefit to the cost estimating community From Product Description to Cost A Practical Approach presents different ways of parametrically forecasting costs and the advantages and disadvantages of these methods by using real examples from the mechanical software and building industries discusses most of the mathematical procedures which are useful for parametrically forecasting costs introduces the judgement needed to audit the ways in which these forecasting techniques are used firstly as a process and secondly as a tool to generate estimates Volume 2 Building a Specific Model is divided into nine parts and focuses on the building of specific cost estimating models These models explicitly refer to a product family and as opposed to general models any company if properly organised can build these models Understanding the procedures is key in creating successful specific models for this reason all these procedures are fully described in this volume Classical methods and new ones such as the bootstrap are described and illustrated
