Autonomous Vehicle Path Planning With Remote Sensing Data:

Path Planning for Autonomous Vehicle Umar Zakir Abdul Hamid, Volkan Sezer, Bin Li, Yanjun Huang, Muhammad Azzat Zakaria, 2019-10-02 Path Planning PP is one of the prerequisites in ensuring safe navigation and manoeuvrability control for driverless vehicles Due to the dynamic nature of the real world PP needs to address changing environments and how autonomous vehicles respond to them This book explores PP in the context of road vehicles robots off road scenarios multi robot motion and unmanned aerial vehicles UAVs

Self-Driving Vehicles and Enabling Technologies

,2021-09-22 This book examines the development and technical progress of self driving vehicles in the context of the Vision Zero project from the European Union which aims to eliminate highway system fatalities and serious accidents by 2050 It presents the concept of Autonomous Driving AD and discusses its applications in transportation logistics space agriculture and industrial and home automation

Autonomous Vehicles in Support of Naval Operations

National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Autonomous Vehicles in Support of Naval Operations, 2005-09-05 Autonomous vehicles AVs have been used in military operations for more than 60 years with torpedoes cruise missiles satellites and target drones being early examples 1 They have also been widely used in the civilian sector for example in the disposal of explosives for work and measurement in radioactive environments by various offshore industries for both creating and maintaining undersea facilities for atmospheric and undersea research and by industry in automated and robotic manufacturing Recent military experiences with AVs have consistently demonstrated their value in a wide range of missions and anticipated developments of AVs hold promise for increasingly significant roles in future naval operations Advances in AV capabilities are enabled and limited by progress in the technologies of computing and robotics navigation communications and networking power sources and propulsion and materials Autonomous Vehicles in Support of Naval Operations is a forward looking discussion of the naval operational environment and vision for the Navy and Marine Corps and of naval mission needs and potential applications and limitations of AVs This report considers the potential of AVs for naval operations operational needs and technology issues and opportunities for improved operations

Robotics: Foundation, Architecture And Applications

Prof. Sonal Chawla, Dr. Ankita Dr. Ramesh Kait, Robotics Foundation Architecture and Applications provides a comprehensive introduction to the principles design and real world applications of robotics It covers the foundational concepts system architectures control mechanisms and practical implementations in industrial medical and service robots Ideal for students researchers and engineers the book bridges theory and practice helping readers understand how robotic systems are designed built and applied across various domains Introduces the fundamentals of robotics including kinematics dynamics and control Explains robot architectures and system design principles Covers practical applications in industry healthcare and service sectors Includes real world examples and case studies for hands on understanding Bridges theory and practice making it suitable for students researchers and
