**Parametric Lie Group Actions on Global Generalised Solutions of Nonlinear PDEs**  
Elemer E. Rosinger, 2013-03-09 This book presents global actions of arbitrary Lie groups on large classes of generalised functions by using a novel parametric approach This new method extends and completes earlier results of the author and collaborators in which global Lie group actions on generalised functions were only defined in the case of projectable or fibre preserving Lie group actions The parametric method opens the possibility of dealing with vastly larger classes of Lie semigroup actions which still transform solutions into solutions These Lie semigroups can contain arbitrary noninvertible smooth mappings Thus they cannot be subsemigroups of Lie groups Audience This volume is addressed to graduate students and researchers involved in solving linear and nonlinear partial differential equations and in particular in dealing with the Lie group symmetries of their classical or generalised solutions

TRIZ first emerged from the former Soviet Union in the 1990s. TRIZ is the Russian acronym for Theory of Inventive Problem Solving. TRIZ is a set of tools for directing creative thinking based upon the study of patents. Breakthrough thinking is not left to creative inspiration. Instead, new and innovative ideas that solve simple to highly complex technical problems or create new inventions can be systematically derived. TRIZICS is an organized process for the practical application of TRIZ; it incorporates TRIZ tools into a simple step-by-step framework that includes the logic of structured problem solving, leverages TRIZ tools for root cause analysis, and directs the user to select the appropriate TRIZ tool to use during the problem solving process.
