political sociological and artistic conditions pre-empted the adoption of electronic music techniques in China until the last two decades of the twentieth century. Korean and Taiwanese perspectives contribute to this rare opportunity to re-examine under a radically different set of cultural preconditions the sweeping musical transformation that similarly consumed the West. Special light is shed on prominent composers such as Sukhi Kang, Toshio Mayuzumi, Toru Takemitsu, and Xiaofu Zhang. Recent trends and new directions which are observed in these countries are also addressed, and the volume shows how the modern fusion of music and technology is triangulated by a depth of culture and other social forces. This book was originally published as a special issue of *Contemporary Music Review*.

Written by a music educator and digital media specialist, it cuts through the jargon to present a concise, easy-to-digest overview of the field, covering notation software, MIDI, sound creation, downloading music, posting personal MP3s for mass distribution. While there are many more technical books, few offer a comprehensive, understandable overview of the field. *Computers in Music Education* is an important text for the growing number of courses in this area.
