

# R-442A (RS-50)

## Características y aplicaciones del R442A (RS-50)

El R442A (RS-50) es una mezcla HFC no inflamable con un ODP = 0, y bajo potencial de calentamiento global (GWP) desarrollado para cumplir las nuevas exigencias internacionales en la F-gas regulados en Europa para la reducción de las emisiones de CO<sub>2</sub> y además aportar un ahorro económico importante al cliente final debido a su alta eficiencia energética.

Algunas de sus características principales son:

- Es una buena alternativa al R404A y R507 para instalaciones nuevas de media y baja temperatura.
- Es un "drop-in" sustituto directo del R404A y R507 en instalaciones existentes.
- El potencial de calentamiento global es menor de lo actual que el R404A y R507.
- Alta eficiencia energética (COP) respecto del R404A y R507.
- Eficiencia frigorífica superior respecto del R404A y R507.
- Es un "retrofit" sustituto indirecto del R22 en refrigeración.
- Su estructura molecular es idéntica a la del R22, y más sencilla que el R404A y R507 por lo que no será necesario aplicar la técnica del engrasado para instalaciones que existieran con R22 y se puede ser reemplazado con seguridad en válvulas de regulación así el caso del R404A y R507.
- Es una mezcla HFO, compatible con aceites sintéticos POE. Permite a su composición una excelente respuesta térmica de modo al comportamiento comparable con el R404A y el R507.

El RS-50 (R442A) es además una excelente alternativa al R404A y R507 tanto en instalaciones nuevas como existentes, aportando una amplia gama de ventajas en el ahorro energético y reducción significativa de las emisiones de CO<sub>2</sub>, estructuras directas o indirectas de R22, y así ser un producto de futuro dentro del sector medio frigorífico.

## Aplicaciones

Debido a que las propiedades del R442A (RS-50) son similares a las del R404A y R507 se utilizarán para las instalaciones de baja y media refrigeración, así también como superfrigoríficos, congeladores, cámaras frigoríficas, cámaras frigoríficas, heladeros refrigerados, frías refrigeración, gases de frío, máquinas de hielo, máquinas superfrigoríficas de helados fríos, procesos de refrigeración, etc.

El R22 también se utiliza en muchos de estas aplicaciones en los que el RS-50 también sería una alternativa.
