complete but always develops in tandem with changing needs i.e. the participation of the affected parties Exploring the principles of GAL theory contributes to addressing the contemporary legal issues relating to state compliance with international aviation safety standards that would otherwise not be covered by customary international law In particular the principles of GAL theory regarding global governance and the public character of global regulations the role of individuals and states in global governance and state sovereignty are considered valuable contributions to contemporary global aviation safety issues in practice It is asserted in this book that proper checks and balances in global aviation safety can be improved by making these accessible to individuals by way of national courts Finally establishing public awareness of global aviation safety standards will eventually create greater pressure on states to implement and enforce them This book is in an area increasing academic and research interest of practitioners of public international aviation law global administrative law global governance and global aviation safety global air transport market regulations Megatrends and Air Transport Ruwantissa Abeyratne, 2017-08-03 This book discusses megatrends and subsequently applies them to the air transport industry from a legal ethical and economic perspective Starting with a detailed discussion on what these megatrends are the book provides an essential overview of megatrends and air transport including analytical discussions on how megatrends could affect basic issues such as nationalism and sovereignty market access in air transport and commercial space transport It also delves into the rights of the airline passenger as affected by megatrends Further the book analyses a broad range of topics including the digital transformation of air transport technology and air transport robotic pilots and their legal ramifications the human robot interface and the law with focus on the pilot cognitive computing and issues of empowerment and connectivity It discusses in detail United Nations initiatives and initiatives of the International Civil Aviation Organization considering aspects such as the new world order e trends and air transport apps that make air travel easier and apps designed to help the aviation authorities Further topics include artificial intelligence and air transport and related technical ethical and economic issues as well as a legal inquiry into manufacturer s defects design defects and liability for failure to warn of defects Questions are posed and answers provided on the effects of artificial intelligence and legal issues stemming from its use in air transport Two major discussions follow on millennials and air transport and on the Internet of everything as related to air transport The conclusion ties in megatrends with air transport and offers the industry a way forward for adapting to these trends **Economics of Air Law** Ruwantissa Abeyratne, 2025-10-10 In a world where air transport is as much a theatre of geopolitics as it is a conduit of commerce Economics of Air Law Intersections of Commerce Policy and the Governance of the Skies is an inquiry into the intersecting legal and economic tectonics of international civil aviation This new book addresses the intricacies of market access aviation related goods and environmental market based measures while confronting the impact of global tariffs This is a rigorous exposition of how law is made and applied but also how it is lived bent and sometimes broken in the face of sovereign will economic retaliation and ideological divergence The reader is guided

through the labyrinth of bilateral aviation diplomacy under China's Belt and Road Initiative the existential frailty of open skies agreements in a fractured legal order and the fragile optimism of climate governance under CORSIA and other market based constructs International law particularly in aviation is no longer a monolith but a contested terrain of plural interpretations political subtexts and interpretive communities It is a reference work for practitioners policymakers scholars and students
