## **Elections In Africa A Data Handbook:**

*Elections in Africa* Dieter Nohlen, Michael Krennerich, Bernard Thibaut, 1999-07-22 Elections have always been an integral part of post independence African politics and have assumed utmost importance in the course of recent democratisation processes However comparative research on the political development in Africa lacks reliable electoral data Elections in Africa fills this gap The handbook is the only reliable source for African elections from independence to present In the first volume of this series Elections in Africa presents a country by country study of African nations that provides a comparative introduction on elections and electoral systems Each country chapter examines the history of the institutional and electoral arrangements the evolution of suffrage and current electoral provisions Precise and exhaustive data on national elections and referendums are presented comparatively The book provides a definitive and comprehensive set of data on elections and electoral systems in order to facilitate comparative research Data is presented in a systematic manner allowing for both historical and cross national comparisons

**Technology Integration and Transformation of Elections in Africa** Cosmas Uchenna Nwokefor, 2017-02-22 Technology Integration and Transformation of Elections in Africa serves as a standard textbook and a reference guide to students in both undergraduate and graduate programs in tertiary institutions where elaborate discourse on the impact of technology to political elections and advancements across the continental Africa have continued to gain weight The rationale in publishing this textbook far more outweighs its timeliness but speaks highly of its significance because it deals with technology integration and transformation of elections in Africa a region whose elections has been continuously marred by corruption and incessant fraudulent activities perpetrated by both the citizens various political parties and the umpires whose responsibilities were to present a credible election Elections in Africa draws international attention and the news is seldom good For instance the elections in Kenya fueled violence that left 1 500 dead and 300 000 displaced while elections in Zimbabwe suffered from massive fraud and brutal suppression In Nigeria in 1999

and 2011 the result of the elections were in shambles and some of the parties that lost the election took to the street resulting in the death of significant percentage of innocent people

*The Origin of Electoral Systems in the Postwar Era* Krister Lundell, 2009-09-10 This book explores and presents the influence of contextual factors on the choice of electoral systems for parliamentary elections in both democracies and non democracies around the world Taking a macroscopic approach the author focuses on structural explanations with an emphasis on general patterns rather than country specific explanations Drawn from a wealth of data the book presents the frequency of the adoption of each electoral formula and system in the postwar era and is followed by a theoretical elaboration of electoral system choice The author then draws on rational cultural historical and institutional theories which are systematically analyzed by means of sophisticated bivariate and multivariate techniques Lundell demonstrates that few electoral systems have been chosen from rational considerations and the impact of the cultural and historical setting is tremendous colonial legacy regional influence and temporal trends largely explain the cross national variation in electoral systems This book will be of interest to students and scholars of political science electoral politics and comparative politics
