Value at location of probe

Question: How does Earth's magnetic field interact with an induced magnetic field?

1. **Observe:** You can use the probe to measure the strength of the magnetic field (represented by the symbol B) at various locations on the grid. The unit for magnetic field strength is the gauss (G). Move the probe to different places on the grid.

A. What is the strength of the magnetic field?

B. Why is there a magnetic field even when there is no current?

2. **Observe:** Set the **Current** to 50 amps. Place the probe at point (50, 0).

A. What is the strength of the field?

B. To find the strength of the induced magnetic field alone, subtract the strength of Earth's magnetic field from value you measured in part A.

What is the strength of the induced magnetic field alone?

3. **Compare:** Now, move the probe to (-50, 0).

A. What is the total strength of the field?
