## Introduction

In addition to steam turbine component design, steam turbine reliability is dependent on many systems that can and will affect its safety and reliability. These systems are:

- Steam system
- Condensing system
- Governor system
- Protection (trip) system
- Trip valve exerciser system
- Steam seal system
- Cooling system
- Monitoring system

Effective monitoring of these systems will ensure the optimum level of safety, reliability and MTBF. This chapter presents these important best practices.
