Michael A. Hitt,2009 *The Oxford Handbook of Mutual, Co-Operative, and Co-Owned Business* Jonathan Michie,Joseph R. Blasi,Carlo Borzaga,2017-03-30 The Oxford Handbook of Mutuals and Co Owned Business investigates all types of member owned organizations whether consumer co operatives agricultural and producer co operatives worker co operatives mutual building societies friendly societies credit unions solidarity organizations mutual insurance companies or employee owned companies Such organizations can be owned by their consumers the producers or the employees whether through single stakeholder or multi stakeholder ownership This complex set of organizations is named differently across countries from mutual in the UK to solidarity cooperatives in Latin America In some countries such organizations are not even officially recognized and thus lack a specific denomination For the sake of clarity this Handbook will refer to member owned organizations to encompass the variety of non investor owned organizations and in the national case study chapters the terms used will be those most widely employed in that country These alternative corporate forms have emerged in a variety of economic sectors in almost all advanced economies since the time of the industrial revolution and the development of capitalism through the subsequent creation and dominance of the limited liability company Until recently these organizations were generally regarded as a rather marginal component of the economy However over the past few years member owned organizations have come to be seen in some countries at least as potentially attractive in light of their ability to tackle various

economic and social concerns and their relative resilience during the financial and economic crises of 2007 2013 The Future of Consumer Society Maurie J. Cohen,2016-11-03 Consumer society in the United States and other countries is receding due to demographic ageing rising income inequality political paralysis and resource scarcity At the same time steady jobs that compensate employees on a salaried or hourly basis are being replaced by freelancing and contingent work The rise of the so called sharing economy the growth of do it yourself production and the spreading popularity of economic localization are evidence that people are striving to find new ways to ensure livelihoods for themselves and their families in the face of profound change Indications are that we are at the early stages of a transition away from a system of social organization predicated on consumerism These developments have prompted some policy makers to suggest providing households with a non labor source of income that would enable more adequate satisfaction of their basic needs These proposals include a universal basic income a citizen s dividend and a legal framework for broad based stock ownership in corporations However extreme political fractiousness makes it unlikely that these recommendations will receive prompt and widespread legislative endorsement in most countries In the meantime we seem to be moving incontrovertibly toward a twenty first century version of feudalism How might we chart a different path founded on social inclusiveness and economic security A practicable option entails establishment of networks of interlinked worker consumer cooperatives that organizationally unify production and consumer Such modes of mutual assistance already exist and The Future of Consumer Society profiles several successful examples from around the world If replicated and scaled worker consumer cooperatives could smooth the transition beyond consumer society and facilitate a future premised on sufficiency resiliency and well being
