**Shield Down** William de Berg,2020-01-07 SGR 0245 05 a dangerous magnetar within close galactic proximity shows signs of erupting just as the Earth is in a magnetic reversal and losing its magnetic shield Professor James Templeton a brilliant but maligned astrophysicist who alone predicted the eruption of 05 is summoned to Washington DC by Dr Jacqueline DeFazio his former lover and head of NASA s Space Life Sciences Division to consult with high ranking governmental officials about the prospects for a major starquake in 05 He tours one of over one hundred American underground mini cities that were built in the preceding decade based on his scientific predictions and is astounded by the realization that NASA and Dr DeFazio were following up massively on his predictions of doom even as they were attacking him in public The magnetar strikes almost immediately after the high level briefing and before he and DeFazio can reignite their relationship Templeton is trapped in DC but manages to return home after a harrowing cross country trip across a dystopian America in the initial stages of societal collapse After two hundred years the restoration of the magnetic shield leads a small number of underground survivors to eventually resurface to a feudal world of warring tribes

Ensnared between Hitler and Stalin David K Zimmerman,2022-12-21 In the 1930s hundreds of scientists and scholars fled Hitler s Germany Many found safety but some made the disastrous decision to seek refuge in Stalin s Soviet Union The vast majority of these refugee scholars were arrested murdered or forced to flee the Soviet Union during the Great Terror Many of the survivors then found themselves embroiled in the Holocaust Ensnared between Hitler and Stalin explores the forced migration of these displaced academics from Nazi Germany to the Soviet Union The book follows the lives of thirty six scholars through some of the most tumultuous events of the twentieth century It reveals that not only did they endure the chaos that engulfed central Europe in the decades before Hitler came to power but they were also caught up in two of the greatest mass murders in history David Zimmerman examines how those fleeing Hitler in their quests for safe harbour faced hardship and grave danger including arrest torture and execution by the Soviet state Drawing on German

Physics, Information, and Meaning David E. Conner, 2026-03-25 What is the essence of life Human experience can be viewed as a series of choices purposive activities and emotional states Even our most trivial actions are prompted by some goal Our experience also includes emotions joy sadness pleasure anxiety and so on Even boredom is a type of emotion But what is the meaning of all this Those who know anything about science are likely familiar with the idea that reality is based ultimately on particles and physical forces Modern scientific worldviews seem to offer no explanation for decisions goals feelings and meanings This book argues against the materialistic mechanistic reductionistic response to science Physics itself especially special relativity and quantum mechanics can be interpreted in ways that support rather than negate humanity's experience of choices values and meanings The process philosophy of Alfred North Whitehead and others is introduced as a useful tool However Whitehead's thought is presented not as a preexisting philosophy that is imported to the interpretation of science but as a set of ideas that Whitehead derived from his own knowledge of relativity and quantum theory The book's final two chapters offer ideas about religion that are compatible with the worldview that has been described
