Gray, 2021-12-02 Blockchain is a technology that tends to be misunderstood by managers that need to make technology acquisition decisions. This book will provide readers with a basic understanding of blockchain and distributed ledger technology (DLT), the technologies that underpin it, and the technologies DLT is built upon. The book is purposefully not a book on how to code or explore other technical aspects of blockchain other than the fundamentals. Rather, it provides managers with the basic understanding of the architectures and consensus algorithms, how they work, the design trade offs of each architecture type, and what problems and use cases the core characteristics of DLT are best suited to solve, providing business managers with the core information they need to ask the right questions of vendors when making business value assessments and acquisition decisions. **Digital Transformation in Tourism and Hospitality** Léo-Paul Dana, Anuj Kumar, Vijay Prakash Gupta, 2025-11-28 In the era of a constantly changing tourism and hospitality landscape, Digital Transformation in Tourism and Hospitality: Sustainable Management Strategies for Long Term Excellence serves as a comprehensive guide on how to lead, innovate, and sustain forward thinking approaches within the industry. **Cybernetic**

Circulation Complex Nick Dyer-Witthford, Alessandra Mularoni, 2025-02-11 An anti capitalist guide to breaking the power of Big Tech Big Tech firms dominate the global economy But what value do they actually produce In this brilliant survey of global tech economy Nick Dyer Witthford and Alessandra Mularoni argue that the role of firms like Amazon and Google Palantir and Uber is in the automation of circulation By applying digital technologies to processes of market exchange everything from advertising and shopping to logistics and financial services Big Tech aims to subject these activities to the level of control and predictability that capital has secured in industrial production But there is a way out of the multiple crises that Big Tech has helped precipitate If we are to break their grip on the global economy then it ll take more than just antitrust legislation or reducing individual time online By understanding the central role Big Tech plays in contemporary capitalism Dyer Witthford and Mularoni argue that what is required instead is a new ambitious and comprehensive program of democratic collective planning that can move us beyond capitalism Cybernetic Circulation Complex offers not only a compelling analysis of the power of Big Tech and their role in our current global crises but a roadmap for a new form of life biocommunist a digital degrowth that can help us steer between the double boundaries of ecological sustainability and equitable social development
