**Intelligence** Heverton Anunciação,2023-12-04 A professional no matter what area he belongs to I believe should never think that his truth is definitive or that his way of doing or solving something is the best And logically I had to get it right and wrong to reach this simple conclusion Now what does that have to do with the purpose of this book This book that I have gathered important tips and advice from an elite of data science professionals from various sectors and reputable experience After I've worked on hundreds of consulting projects and implementation of best practices in Relationship Marketing CRM Business Intelligence BI and Customer Experience CX as well as countless Information Technology projects one truth is absolute We need data Most companies say they do everything perfect but it is not shown in the media or the press the headache that the areas of Information Technology suffer to join the right data And when they do manage to unite and make it available the time to market has already been lost and possible opportunities Therefore if a company wants to be considered excellence in corporate governance and satisfy the legal marketing sales customer service technology logistics products among other areas this company must start as soon as possible to become a data driven and real time company For

this I recommend companies to look for their digital intuitions and digital inspirations So with this book I am proposing that all the employees and companies will arrive one day that they will know how to use from their data their sixth sense The sixth sense is an extrasensory perception which goes beyond our five basic senses vision hearing taste smell touch It is a sensation of intuition which in a certain way allows us to have sensations of clairvoyance and even visions of future events A company will only achieve this ability if it immediately begins to apply true data governance And the illustrious data scientists who are part of this book will show you the way to take the first step Eric Siegel Predictive Analytics World USA Bill Inmon The Father of Datawarehouse Forest Rim Technology USA Bram Nauts ABN AMRO Bank Netherlands Jim Sterne Digital Analytics Association USA Terry Miller Siemens USA Shivanku Misra Hilton Hotels USA Caner Canak Turkcell Turkey Dr Kirk Borne Booz Allen Hamilton USA Dr B lent K z ltan Harvard University USA Kate Strachnyi Story by Data USA Kristen Kehrer Data Moves Me USA Marie Wallace IBM Watson Health Ireland Timothy Kooi DHL Singapore Jesse Anderson Big Data Institute USA Charles Givre JPMorgan Chase 2nd The Book of all Methodologies and Tools to Improve and Profit from Customer Experience and Service 3rd Data Science and Business Intelligence Advice from reputable Data Scientists around the world and plus the book The Official Dictionary for Internet Computer ERP CRM UX Analytics Big Data Customer Experience Call Center Digital Marketing and Telecommunication The Vocabulary of One New Digital World

**The Data Scientist and his Demons** Heverton Anunciação, 2025-08-15 Yes it s true that the devil can be in the details What are the best characteristics of an excellent data scientist or statistician You are mistaken if you thought about mathematical knowledge or mastery of data tools Those receiving salaries of up to thousands of reais per day of work have something in common they are humble and know that they are never sure but they persistently know how to create bridges between information repositories or even departments of people This same data scientist will have to break boundaries between departmental areas that do not speak to each other to reach a common and ideal result for the short medium or long term Each of these professionals who share their knowledge in this book presents their own experience of how to involve data people and techniques At times this same data scientist acts as a data therapist understanding your past and traumas going back in time to understand your evolution to transform this same data into digital wisdom and get the best out of it A company that does not apply data science with CRM Customer Experience Commercial Intelligence and other concepts to constantly reformulate itself as a brand and product may have its days numbered Show your data to an extremely qualified data scientist and he or she will tell you what future your company will have Would your company have the courage to have a professional with this skill The market is looking for you data scientist
