Awesome Algebra: Looking for Patterns and Generalizations We do not usually think of algebra as a topic for the elementary mathematics classroom. However, algebra is one of the five major content strands outlined by the National Council of Teachers of Mathematics (NCTM) in *Principles and Standards for School Mathematics* (2000). Looking for patterns, extending a pattern, making a generalization about a pattern—all are part of algebraic thinking. So we talk about algebraic thinking or reasoning as opposed to the formal study of algebra. In our Project M unit *Awesome Algebra: Looking for Patterns and Generalizations*, students are encouraged to study patterns and determine how they change, how they can be extended or repeated, and/or how they grow. They then move beyond this to organize the information systematically and analyze it to develop generalizations about the mathematical relationships in the patterns. There is a strong focus on mathematical discourse revolving around how to verbalize a generalization. During *Awesome Algebra: Looking for Patterns and Generalizations*, students will be encouraged to use the idea of a variable as they think about how to represent a rule. This will help them become aware of the usefulness of a variable when representing a generalization. Our emphasis on number patterns is designed to challenge mathematically talented students by encouraging them to take a new look at basic number concepts that is arithmetic from an algebraic perspective. Students will become better estimators and give effective tools to perform computation mentally. We hope that the experiences and discussions in the unit will provide a rich context for introducing students to algebraic thinking and strengthen their reasoning and communication skills.

Student Mathematician's Journal The *Student Mathematician's Journal* is a unique feature of every unit in the Project M *Mentoring Mathematical Minds* series, encouraging students to communicate in writing. It includes the student worksheets from each lesson. In these journals, we ask students to reflect on what they have learned and write about it. In effect, they are working
