

Cognitive Development

Ages 2-3

Between the ages of two and three years old, toddlers are likely to reach some but not necessarily all of the cognitive development milestones below. Please keep in mind that toddlers will progress in these skills at different rates, so it is important to support them at their unique stage of development.

Between the ages of two and three years old, toddlers may:

▶ explore how things work by touching them and trying them out, such as turning wheels on a toy car, switching things on and off on a busy board or turning door handles

▶ build taller towers (somewhere between four to seven objects), placing the objects in a logical order, such as stacking them from largest to smallest

▶ enjoy playing with messy materials and explore what the materials can do more than making things with them

▶ match an object held in their hand or seen in the room to a picture in a book

▶ understand the difference between things that are similar and things that are different

▶ begin to understand the difference between things that are similar and things that are different
