**Social Collective Intelligence** Daniele

Miorandi,Vincenzo Maltese,Michael Rovatsos,Anton Nijholt,James Stewart,2014-09-17 The book focuses on Social Collective Intelligence a term used to denote a class of socio technical systems that combine in a coordinated way the strengths of humans machines and collectives in terms of competences knowledge and problem solving capabilities with the communication computing and storage capabilities of advanced ICT Social Collective Intelligence opens a number of challenges for researchers in both computer science and social sciences at the same time it provides an innovative approach to solve challenges in diverse application domains ranging from health to education and organization of work The book will provide a cohesive and holistic treatment of Social Collective Intelligence including challenges emerging in various disciplines computer science sociology ethics and opportunities for innovating in various application areas By going through the book the reader will gauge insight and knowledge into the challenges and opportunities provided by this new exciting field of investigation Benefits for scientists will be in terms of accessing a comprehensive treatment of the open research challenges in a multidisciplinary perspective Benefits for practitioners and applied researchers will be in terms of access to novel approaches to tackle relevant problems in their field Benefits for policy makers and public bodies representatives will be in terms of understanding how technological advances can support them in supporting the progress of society and economy

*Advances in Computational Intelligence Systems* Zhaojie Ju,Longzhi Yang,Chenguang Yang,Alexander Gegov,Dalin Zhou,2019-08-29 This book highlights the latest research in computational intelligence and its applications It covers both conventional and trending approaches in individual chapters on Fuzzy Systems Intelligence in Robotics Deep Learning Approaches Optimization and Classification Detection Inference and Prediction Hybrid Methods Emerging Intelligence Intelligent Health Care and Engineering Data and Model Driven Applications All chapters are based on peer reviewed contributions presented at the 19th Annual UK Workshop on Computational Intelligence held in Portsmouth UK on 4 6 September 2019 The book offers a valuable reference guide for readers with expertise in computational intelligence or who are seeking a comprehensive and timely review of the latest trends in computational intelligence Special emphasis is placed on novel methods and their use in a wide range of application areas updating both academics and professionals on the state of the art

**Collective Intelligence** Uwe Seebacher,Christoph Legat,2024-11

The book is a thought leading book that explores the latest advancements in swarm intelligence and their applications in various industries especially elaborating the matter area of artificial intelligence The book goes beyond the traditional understanding of swarm intelligence as a mechanism for coordinating the behavior of groups of individuals or animals and looks at how it can be used to create more efficient sustainable leading edge systems in the 21st century ICCWS 2015 10th International Conference on Cyber Warfare and Security Jannie Zaaiman,Louise Leenan,2015-02-24 These Proceedings are the work of researchers contributing to the 10th International Conference on Cyber Warfare and Security ICCWS 2015 co hosted this year by the

University of Venda and The Council for Scientific and Industrial Research The conference is being held at the Kruger National Park South Africa on the 24 25 March 2015 The Conference Chair is Dr Jannie Zaaïman from the University of Venda South Africa and the Programme Chair is Dr Louise Leenen from the Council for Scientific and Industrial Research South Africa

**Advanced Artificial Intelligence (Second Edition)** Zhongzhi Shi, 2019-08-05 The joint breakthrough of big data cloud computing and deep learning has made artificial intelligence AI the new focus in the international arena AI is a branch of computer science developing intelligent machine with imitating extending and augmenting human intelligence through artificial means and techniques to realize intelligent behaviour This comprehensive compendium consisting of 15 chapters captures the updated achievements of AI It is completely revised to reflect the current researches in the field through numerous techniques and strategies to address the impending challenges facing computer scientists today The unique volume is useful for senior or graduate students in the information field and related tertiary specialities It is also a suitable reference text for professionals researchers and academics in AI machine learning electrical electronic engineering and biocomputing

**Industrial and Robotic Systems** Eusebio E. Hernandez, Sajjad Keshtkar, S. Ivvan Valdez, 2020-05-13 This volume gathers the latest advances innovations and applications in the field of robotics engineering as presented by leading international researchers and engineers at the Latin American Symposium on Industrial and Robotic Systems LASIRS held in Tampico Mexico on October November 30 01 2019 The contributions cover all major areas of R D and innovation in simulation optimization and control of robotics such as design and optimization of robots using numerical and metaheuristic methods autonomous and control systems industrial compliance solutions numerical simulations for manipulators and robots metaheuristics applied to robotics problems Industry 4 0 control and automation in petrochemical processes simulation and control in aerospace and aeronautics and education in robotics The conference represented a unique platform to share the latest research and developments in simulation control and optimization of robotic systems and to promote cooperation among specialists in machine and mechanism area

**Neuroscience-Enhanced Artificial Intelligence for Cybersecurity** Ul Rehman, Shafiq, 2025-12-30 As cyber threats grow in complexity and sophistication traditional defense mechanisms often struggle to keep pace with evolving attacks Neuroscience inspired artificial intelligence AI offers a groundbreaking approach by mimicking the adaptive processes of the human brain to enhance cybersecurity systems By integrating principles such as pattern recognition and cognitive decision making these advanced AI models can detect anomalies and respond dynamically in real time Neuroscience driven AI architecture can revolutionize cybersecurity bridging the gap between human like intelligence and machine efficiency to create resilient proactive defense frameworks Neuroscience Enhanced Artificial Intelligence for Cybersecurity explores how cognitive processes and brain inspired models can revolutionize AI systems to defend against cyber threats This book examines how brain inspired models can enhance cybersecurity Covering topics such as neuroscience cybersecurity and AI this book is an excellent resource for researchers cybersecurity professionals

Cultural-Historical Perspectives on Collective Intelligence Rolf K. Baltzersen, 2022-01-20 In the era of digital communication collective problem solving is increasingly important Large groups can now resolve issues together in completely different ways which has transformed the arts sciences business education technology and medicine Collective intelligence is something we share with animals and is different from machine learning and artificial intelligence To design and utilize human collective intelligence we must understand how its problem solving mechanisms work From democracy in ancient Athens through the invention of the printing press to COVID 19 this book analyzes how humans developed the ability to find solutions together This wide ranging thought provoking book is a game changer for those working strategically with collective problem solving within organizations and using a variety of innovative methods It sheds light on how humans work effectively alongside machines to confront challenges that are more urgent than what humanity has faced before This title is also available as Open Access on Cambridge Core

### **New Challenges in Computational Collective Intelligence**

Radoslaw Katarzyniak, Adam Janiak, 2009-09-29 Collective intelligence has become one of major research issues studied by today s and future computer science Computational collective intelligence is understood as this form of group intellectual activity that emerges from collaboration and competition of many artificial individuals Robotics artificial intelligence artificial cognition and group working try to create efficient models for collective intelligence in which it emerges from sets of actions carried out by more or less intelligent individuals The major methodological theoretical and practical aspects underlying computational collective intelligence are group decision making collective action coordination collective competition and knowledge description transfer and integration Obviously the application of multiple computational technologies such as fuzzy systems evolutionary computation neural systems consensus theory knowledge representation etc is necessary to create new forms of computational collective intelligence and support existing ones Three subfields of application of computational technologies to support forms of collective intelligence are of special attention to us The first one is semantic web treated as an advanced tool that increases the collective intelligence in networking environments The second one covers social networks modeling and analysis where social networks are this area of in which various forms of computational collective intelligence emerges in a natural way The third subfield relates us to agent and multi agent systems understood as this computational and modeling paradigm which is especially tailored to capture the nature of computational collective intelligence in populations of autonomous individuals
