Evolutionary Algorithms for Solving Multi-Objective Problems Carlos Coello Coello, David A. Van Veldhuizen, Gary B. Lamont, 2013-03-09 Researchers and practitioners alike are increasingly turning to search optimization and machine learning procedures based on natural selection and natural genetics to solve problems across the spectrum of human endeavor These genetic algorithms and techniques of evolutionary computation are solving problems and inventing new hardware and software that rival human designs The Kluwer Series on Genetic Algorithms and Evolutionary Computation publishes research monographs edited collections and graduate level texts in this rapidly growing field Primary areas of coverage include the theory implementation and application of genetic algorithms GAs evolution strategies ESs evolutionary programming EP learning classifier systems LCSs and other variants of genetic and evolutionary computation GEC The series also publishes texts in related fields such as artificial life adaptive behavior artificial immune systems agent based systems neural computing fuzzy systems and quantum computing as long as GEC techniques are part of or inspiration for the system being described This encyclopedic volume on the use of the algorithms of genetic and evolutionary computation for the solution of multi objective problems is a landmark addition to the literature that comes just in the nick of time Multi objective evolutionary algorithms MOEAs are receiving increasing and unprecedented attention Researchers and practitioners are finding an irresistible match between the population available in most genetic and evolutionary algorithms and the need in multi objective problems to approximate the Pareto trade off curve or surface
