*Quantitative Methods for Second Language Research* Carsten Roever, Aek Phakiti, 2017-07-20 *Quantitative Methods for Second Language Research* introduces approaches to and techniques for quantitative data analysis in second language research with a primary focus on second language learning and assessment research. It takes a conceptual problem solving approach by emphasizing the understanding of statistical theory and its application to research problems while paying less attention to the mathematical side of statistical analysis. The text discusses a range of common statistical analysis techniques presented and illustrated through applications of the IBM Statistical Package for Social Sciences SPSS program. These include tools for descriptive analysis e.g. means and percentages as well as inferential analysis e.g. correlational analysis, t tests and analysis of variance ANOVA. The text provides conceptual explanations of quantitative methods through the use of examples, cases and published studies in the field. In addition, a companion website to the book hosts slides, review exercises and answer keys for each chapter as well as SPSS files. Practical and lucid, this book is the ideal resource for data analysis for graduate students and researchers in applied linguistics.

**Research Methods for the Behavioral Sciences** Gregory J. Privitera, 2024-08-01 *Research Methods for the Behavioral Sciences* Fourth Edition employs a problem focused approach to present a clear and comprehensive introduction to research methods. Award winning teacher and author Gregory J. Privitera fully integrates the research methods decision tree into the design process to help students choose the most appropriate method for the research question they are seeking to answer. The book's conversational writing style and student focused features empower students to view research methods as something they can both understand and apply. Over the course of the book, students learn how to structure a study to answer a research question and navigate through the process of choosing an appropriate analysis or statistic to write a research report. New elements to the Fourth Edition include a new standalone chapter on qualitative research, assumptions testing throughout chapters on quantitative research and updated examples and figures to communicate the latest updates in behavioral science research.
