Islamic Accounting And Finance: A Handbook Khaled Hussainey, Hidayat Al Lawati, 2023-03-23 Islamic finance is one of the fastest growing sectors in international banking and finance. Owing to the increasing availability and ease of access to Islamic services, Islamic finance has become increasingly important not only in Muslim countries but around the world, making it a global industry. Under the Gulf Cooperation Council (GCC) as well as in some regions such as the Middle East and North Africa, a dual financial system is implemented where Sharia-compliant products are marketed alongside conventional financial systems. In this thoroughly researched collection of chapters, researchers from around the world examine the role of Islamic finance in the economies and prospects of different companies. They discuss Islamic finance literature from both theoretical and empirical perspectives. The theoretical section of the book consists of conceptual chapters that enable readers to critically evaluate and expand their understanding of accounting and finance. The chapters in the empirical section of this handbook discuss and interpret empirical evidence to provide clear implications for practice, research, and society. This section bridges the gap between theory and practice and offers suggestions for future research. Islamic Accounting and Finance is geared towards scholars and students but it is also of use to banking and finance practitioners.

BISIC 2020 P. Parwito, P. Praningrum, Karona Cahya Susena, M. Yasser Iqbal Daulay, Robbi Rahim, 2021-05-11 The Faculty of Economics and Business, Bengkulu University (UNIB) Provinsi Bengkulu, Indonesia organized the 3rd Beehive International Social Innovation Conference (BISIC 2020) on 3rd-4th Oct 2020 in Bengkulu, Indonesia. The number of participants who joined the Zoom room was recorded at 450 participants. Participants came from 4 countries, namely Indonesia, Malaysia, Philippines, and Thailand. BISIC 2020 is implemented with the support of a stable internet network system and a Zoom application. In the implementation, there were several technical obstacles encountered by the participants, namely the difficulty of joining the Zoom application due to the unstable internet signal. The holding of a virtual conference felt less meaningful due to the lack of interaction between speakers and participants. The BISIC 2020 committee presented and discussed 30 papers. The papers were authored by researchers from Thailand, Malaysia, Philippines, and Indonesian. All papers have been scrutinized by a panel of reviewers who provide critical comments and corrections and thereafter contributed to the improvement of the quality of the papers.

Partial Least Squares Structural Equation Modeling (PLS-SEM) Using R Joseph F. Hair Jr.,G. Tomas M. Hult,Christian M. Ringle,Marko Sarstedt,Nicholas P. Danks,Soumya Ray,2021-11-03 Partial least squares structural equation modeling PLS SEM has become a standard approach for analyzing complex inter relationships between observed and latent variables Researchers appreciate the many advantages of PLS SEM such as the possibility to estimate very complex models and the method s flexibility in terms of data requirements and measurement specification This practical open access guide provides a step by step treatment of the major choices in analyzing PLS path models using R a free software environment for statistical computing which runs on Windows macOS and UNIX computer platforms Adopting the R software s SEMinR package which brings a friendly syntax to creating and estimating structural equation models each chapter offers a concise overview of relevant topics and metrics followed by an in depth description of a case study Simple instructions give readers the how tos of using SEMinR to obtain solutions and document their results Rules of thumb in every chapter provide guidance on best practices in the application and interpretation of PLS SEM

A Primer on Partial Least Squares Structural Equation Modeling (PLS-SEM) Joseph F. Hair,2014 A Primer on Partial Least Squares Structural Equation Modeling PLS SEM by Hair Hult Ringle and Sarstedt provides a concise yet very practical guide to understanding and using PLS structural equation modeling PLS SEM PLS SEM is evolving as a statistical modeling technique and its use has increased exponentially in recent years within a variety of disciplines due to the recognition that

PLS SEM's distinctive methodological features make it a viable alternative to the more popular covariance based SEM approach. This text, the only comprehensive book available to explain the fundamental aspects of the method, includes extensive examples on SmartPLS software and is accompanied by multiple data sets that are available for download from the accompanying website www.pls-sem.com.

Advanced Issues in Partial Least Squares Structural Equation Modeling Joseph F. Hair, Jr., Marko Sarstedt, Christian M. Ringle, Siegfried P. Gudergan, 2023-08-21. The Second Edition of *Advanced Issues in Partial Least Squares Structural Equation Modeling* offers a straightforward and practical guide to PLS SEM for users ready to go further than the basics of *A Primer on Partial Least Squares Structural Equation Modeling* Third Edition. Even in this advanced guide, the authors have limited the emphasis on equations, formulas, and Greek symbols and instead rely on detailed explanations of the fundamentals of PLS SEM and provide general guidelines for understanding and evaluating the results of applying the method. A single study on corporate reputation features as an example throughout the book, along with a single software package, SmartPLS 4.0, to provide a seamless learning experience. The approach of this book is based on the authors' many years of conducting research and teaching methodology courses, including developing the SmartPLS software. The preparation of the book, especially this new edition, is based on the authors' desire to communicate the PLS SEM method to a much broader audience, from management and marketing to engineering, geography, medicine, political and environmental sciences, psychology, and beyond. The Second Edition includes a new chapter on the necessary condition analysis (NCA) and covers the most recent developments in PLS SEM with detailed guidelines for estimating and validating higher order constructs and nonlinear effects, as well as more insights on multigroup and latent class analyses using FIMIX-PLS and PLS-POS. The book is aimed at researchers and practitioners who seek to gain comprehensive knowledge of more advanced PLS SEM methods.

Basic Principles of Structural Equation Modeling Ralph O. Mueller, 2012-12-06. During the last two decades, structural equation modeling (SEM) has emerged as a powerful multivariate data analysis tool in social science research settings, especially in the fields of sociology, psychology, and education. Although its roots can be traced back to the first half of this century when Spearman (1904) developed factor analysis and Wright (1934) introduced path analysis, it was not until the 1970s that the works by Karl Joreskog and his associates, e.g., Joreskog (1977), Joreskog and Van Thillo (1973), began to make general SEM techniques accessible to the social and behavioral science research communities. Today, with the development and increasing availability of SEM computer programs, SEM has become a well-established and respected data analysis method, incorporating many of the traditional analysis techniques as special cases. State-of-the-art SEM software packages such as LISREL (Joreskog and Sorbom, 1993a, b) and EQS (Bentler, 1993; Bentler and Wu, 1993) handle a variety of ordinary least squares regression designs, as well as complex structural equation models involving variables with arbitrary distributions. Unfortunately, many students and researchers hesitate to use SEM methods, perhaps due to the somewhat complex underlying statistical representation and theory. In my opinion, social science students and researchers can benefit

greatly from acquiring knowledge and skills in SEM since the methods applied appropriately can provide a bridge between the theoretical and empirical aspects of behavioral research
