when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question s own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors The Fountain ,2009 *International Books in Print, 1995* Barbara Hopkinson,[Anonymus AC01401231],1995 **Research Methodology** C.
