UNIT 1

Q1:- Introduction?

Research Methodology refers to the systematic process used to collect, analyze, and interpret information to increase understanding of a topic or issue. It provides a framework for conducting research in a logical and scientific way. Research means a careful investigation or inquiry through search for new facts in any branch of knowledge. Derived from "re" (again) and "search" (to find), it means to search again — a systematic effort to gain new knowledge.

Objectives of Research

- 1.To discover new facts or verify old ones.
- 2.To understand relationships between variables.
- 3.To find solutions to problems.
- 4.To develop new theories or test existing ones.
- 5.To aid decision-making and policy formulation.

Research Process

- 1.Identification of the Problem – Define what to study.
- 2.Review of Literature – Study previous research.
- 3.Formulation of Hypothesis – Develop assumptions or propositions.
- 4.Research Design – Plan the structure of the research.
- 5.Data Collection – Gather relevant information.
- 6.Data Analysis & Interpretation – Use statistical tools to analyze data.
- 7.Conclusion & Recommendations – Draw results and suggest improvements.
- 8.Report Writing – Present findings in a systematic way.

Research Design

A research design is the blueprint for conducting research — it specifies methods for data collection, measurement, and analysis.

Types:

- 1.Exploratory
- 2.Descriptive

Micro and Macro Economics Dr. Kahkasha Safi, Dr. Prashant Kumar, Miss Prasoon Gupta, 2024-04-16 This book covers MICRO and MACRO Economics theory, written for students of BBA, B.COM, M.COM, and MBA. This book covers the syllabus of almost all the universities and institutions running with the courses. Although this book is for under-graduation, but it also covers up the syllabus of the post-graduation classes and even for the beginners of the subject who have knowledge on the priority basis in this field would find this book easy to understand. The graph and mathematical analysis has been used but in a manner that even without mathematics background, students will find it more easy to grasp the points. The explanations and examples of the books are specifically written with the concepts of economics in the background and are not general cases on management. This will further enhance the value of the book in the future. I have a great pleasure in presenting this book to the faculties and students of this subject. Although there are many books available in the market on this subject, but my experience of about ten years shows that the students somehow miss out on the basic concept of the topic and therefore tend to consider this subject as very tough and difficult. Hence, in writing this book, special emphasis has been laid on the simplicity of language and presentation without losing the academic rigor of the contents. Even difficult topics have been presented in such a manner that the student understands it easily. Unnecessary details have been avoided.
