Berthe, D. Dowson, M. Godet, C.M. Taylor, 1989-10-03 On previous occasions each Symposium has focused attention on a current and significant research topic usually reflecting the interests of the Leeds or Lyon research groups however this time the main focus was on the vitally important subject of technology transfer providing the 154 delegates from 21 countries with the rare opportunity to discuss the impact of their studies on machine design Testing Tribocorrosion of Passivating Materials Supporting Research and Industrial Innovation Jean-Pierre Celis, 2017-07-05 This first edition of Testing Tribocorrosion of Passivating Materials Supporting Research and Industrial Innovation A Handbook treats in a clear concise and practical manner an important material degradation and protection matter It is designed as a handbook and provides a well structured approach of the basics needed to investigate the tribocorrosion behavior of passivating materials and to conduct in a correct way a laboratory investigation on it It provides answers on practical and theoretical approaches of tribocorrosion phenomena to engineers and medical persons involved with material assemblies subjected to aggressive environmental and mechanical conditions For academic researchers it is a pertinent tool assisting them in how they can perform a tribocorrosion investigation and obtain results that are correctly interpreted and can be exchanged Different parts of the book are illustrated with practical examples This handbook is truly an indispensable guide for every professional who comes into contact with the complex material degradation and protection processes that take place under combined corrosion and wear conditions Fields of interest include transportation aeronautics maritime rail automotive medical implants orthopaedics dentistry biochemistry food production energy production and machining The coordination of this handbook writing was done by Professor Jean Pierre Celis Katholieke Universiteit Leuven Belgium and Professor Pierre Ponthiaux Ecole Centrale Paris France assisted by twelve European experts who contributed jointly to the nine chapters of this handbook Main topics dealt with are tribocorrosion phenomena in medical and industrial sectors depassivation and repassivation phenomena impact on synergism in tribocorrosion specific testing techniques coupling tribology to corrosion design of a testing protocol and normalisation

Tribology in Machine Design T. A. Stolarski, 2013-10-22 Tribology in Machine Design aims to promote a better appreciation of the increasingly important role played by tribology at the design stage in engineering This book shows how algorithms developed from the basic principles of tribology can be used in a range of practical applications The concept of tribodesign is introduced in Chapter 1 Chapter 2 is devoted to a brief discussion of the basic principles of tribology including some concepts and models of lubricated wear and friction under complex kinematic conditions Elements of contact mechanics presented in Chapter 3 are confined to the most technically important topics Tribology of lower kinematic pairs sliding element bearings and higher kinematic pairs are discussed in Chapters 4 5 and 6 respectively Chapter 7 contains a discussion of rolling contact bearings with particular emphasis on contact problems surface fatigue and lubrication techniques Finally Chapter 8 concentrates on lubrication and surface failures of involute gears This book is planned as a comprehensive reference and source that will not only be useful to practicing designers researchers and postgraduate students but will also find an essential place in libraries catering for engineering students on degree courses in universities and polytechnics
