Java types such as classes and interfaces as well as experience in compiling and executing Java programs
What You Will Learn
Get introduced to the concept of modules and modular programming by working on a fully modular Java application
Build and configure your own Java 9 modules
Work with multiple modules and establish inter module dependencies
Understand and use the principles of encapsulation readability and accessibility
Use jlink to generate fully loaded custom runtime images like a pro
Discover the best practices to help you write awesome modules that are a joy to use and maintain
Upgrade your old Java code to use the new Java 9 module system
In Detail
The Java 9 module system is an important addition to the language that affects the way we design write and organize code and libraries in Java
It provides a new way to achieve maintainable code by the encapsulation of Java types as well as a way to write better libraries that have clear interfaces
Effectively using the module system requires an understanding of how modules work and what the best practices of creating modules are
This book will give you step by step instructions to create new modules as well as migrate code from earlier versions of Java to the Java 9 module system
You ll be working on a fully modular sample application and add features to it as you learn about Java modules
You ll learn how to create module definitions setup inter module dependencies and use the built in modules from the modular JDK
You will also learn about module resolution and how to use jlink to generate custom runtime images
We will end our journey by taking a look at the road ahead
You will learn some powerful best practices that will help you as you start building modular applications
You will also learn how to upgrade an existing Java 8 codebase to Java 9
handle issues with libraries and how to test Java 9 applications
Style and Approach
The book is a step by step guide to understanding Modularity and building a complete application using a modular design
