All the contributions have been peer reviewed and by scientific committee members with report about quality content and originality.

CNC FANUC TURNING CYCLES LORENZO RAUSA, 2021-02-18. The purpose of this book is to explain the Fanuc turning canned cycles through a new didactic concept. In different manuals it is easy to find contrasting descriptions regarding the Fanuc turning canned cycles. Some manuals present the G74 function as an axial drilling cycle and others present it as a grooving cycle along the Z axis. The G75 function is also described in some texts as a radial grooving cycle while in others it is defined as a radial drilling cycle. It should be added that the G75 function is also able to perform a facing cut with chip breaking. The book aims to explain the Fanuc turning cycles in a definite way by adopting a new didactic method that is not limited to the simple description of cycle parameters but includes all the machining operations that each cycle is able to perform. 1989, [Industrial Training And Education](#) Lokesh Choudhary, 2007. In construction for instance automation is less likely to diminish employment opportunities than it is to increase productivity. Indeed automation alongside the global need for new and updated infrastructure and better and more affordable housing can help shape the direction of the construction industry. The key will be anticipating and preparing for

the shift in part by developing new skills in the current and future workforce This book presents all aspects of automation in construction pertaining to the use of information technologies in design engineering construction technologies and maintenance and management of constructed facilities The broad scope encompasses all stages of the construction life cycle from initial planning and design through the construction of the facility its operation and maintenance to the eventual dismantling and recycling of buildings and engineering structures Features Examines Building Information Management systems allowing on site execution of construction more efficient and for project teams to eliminate mistakes and better coordinate the workforce Presents the latest information on the automation of modular construction production in factories including 3 D printing of components such as facades or even load bearing and essential components **Annual Report** India.
