

Friction problems

Example

If the package is on the point of moving, find μ .

Think about What forces are acting on the package?

Vertical forces: $R = 0.4g$

Solution

where $g = 9.8 \text{ m s}^{-2}$

On the point of moving

$$F = \mu R = \mu \times 0.4g$$

$$F = T$$

As the pulley is smooth $T = 0.2g$

$$\mu \times 0.4g = 0.2g$$

$$\mu = \frac{0.2g}{0.4g} = \frac{1}{2}$$

Physics—Problems, Solutions, and Computer Calculations Wan Muhamad Saridan Wan Hassan, 2023-11-06

Knowledge of and skill in physics are essential foundations for studies in science and engineering This book offers students an introduction to the basic concepts and principles of physics It covers various topics specifically related to physical mechanics the properties of matter and heat Each chapter begins with a summary of concepts principles definitions and formulae to be discussed as well as ending with problems and solutions that illustrate the specific topic Steps are detailed to help build reasoning and understanding There are 300 worked problems and 100 exercises in the book as well as 306 figures to help the reader visualize the processes being addressed Computer calculations and solutions are carried out using wxMaxima to give insight and help build computational skills The book is aimed at first year undergraduate students

studying introductory physics and would also be useful for physics teachers in their instruction particularly the exercises at the end of each chapter **NASA Technical Paper** ,1988 *Finite Elements* Eric B. Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies

Science Abstracts ,1919 **The Cognitive Psychology of Knowledge** G. Strube, K.F. Wender, 1993-10-01 The present book is a result of a seven year 1986 1992 national research program in cognitive science in Germany presumably the first large scale cognitive science program there Anchored in psychology and therefore christened Wissenspsychologie psychology of knowledge it has found interdisciplinary resonance especially in artificial intelligence and education The research program brought together cognitive scientists from over twenty German universities and more than thirty single projects were funded The program was initiated by Heinz Mandl and Hans Spada the main goals of which were to investigate the acquisition of

knowledge the access to knowledge and the modification and application of knowledge from a psychological perspective. Emphasis was placed on formalisms of knowledge representation and on the processes involved. In many of the projects this was combined with computer simulations. A final but equally important goal was the development of experimental paradigms and methods for data analysis that are especially suited to investigate knowledge based processes. The research program has had a major impact on cognitive psychology in Germany. Research groups were established at many universities and research equipment was provided. It also inspired a considerable number of young scientists to carry out cognitive research employing modeling techniques from artificial intelligence for psychological theorizing and construct intelligent tutoring systems for education. Close contacts with cognitive scientists in the U S have helped to firmly integrate the program with international research endeavours. Each year one or two workshops were held. The present volume is the result of the final workshop which was held in September 1992. Selected results from seventeen projects are presented in this book. The volume is enriched by three guest scholars who agreed to participate in the final workshop and to comment on the chapters of the book.
