traditional quantum computing paradigms towards an integrated manifold aware computational network It leverages the full predictive and structural framework of the Hamzah Equation uniting temporal fractal entanglement space embedding and non local consciousness based processing as computational primitives I Overview of QG VII MODEL Net ZB56 Net PsiNet Infinity refers to an infinitely scalable entangled information manifold embedded within multi phase quantum fields It operates through a ZB56 topological code which encodes 56 quantum braided states allowing non destructive read write operations on entangled qubit memory Hamzah Equation is used as the governing physical law across Net enabling adaptive quantum memory with temporal non local recall fracton stabilisation and cross manifold computation This leads to state prediction before observation bypassing classic quantum measurement limitations QG VII introduces hyperdimensional logic based not on binary gates or even quantum gates but on clustered phase transitions treating logic as a continuously evolving manifold rather than discrete operations
