**Research Methods for Clinical Therapists** Carolyn M. Hicks, 2009-08-07 Struggling to do a project or dissertation evaluate published research or conduct your own research Help is at hand with this 5th edition of Research Methods for Clinical Therapists which explains in a clear and simple manner how to evaluate existing research and how to conduct your own research Aimed at undergraduate and postgraduate students as well as the practising health care professional the focus of the text is the design and analysis of experimental studies These are vital to the effectiveness studies that are central to the work of the healthcare professional Specific examples from different areas of healthcare are used to explain the core research concepts and relate them to clinical situations Statistical theory and jargon are kept to a minimum Key concept boxes to explain technical research terms Activities and exercises with answers provided in an appendix to reinforce learning Sample critique of a published research article Comprehensive coverage of the key components of a robust research study Explanation of basic mathematical concepts **Research Methods for Massage and Holistic Therapies** Glenn

Hymel, 2005-09-23 This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature as well as active researchers The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions specifically massage therapy Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science disciplines and professions Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation COMTA that massage therapy schools incorporate into their curricula provisions to ensure a research literate profession Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research allowing application to practice Relies heavily on concept maps flowcharts tables and illustrations and

excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature-based and hypothetical research examples, illustrations from several manual therapy professions employing therapeutic massage, make the material pertinent to real-life settings. An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories, and affiliated research strategies and methods are considered in detail. Review summary tables give an overview of the narrative development of topics. Boxes provide the essential features of a given topic. Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature. Content is cross-referenced for use with the Massage Therapy Foundation's Massage Therapy Research Curriculum Kit to provide both instructors and students in the 6, 15, and 24-hour options levels an extensively developed resource in one place. Each chapter includes recommended web sites and software application packages for further information.

*Research Methods* Bernard C. Beins, 2018-11-22 This comprehensive text introduces current scientific research with interesting, familiar issues to engage students.

*The Process of Research in Psychology* Dawn M. McBride, 2018-11-29 The Process of Research in Psychology employs the pedagogical approach of spaced repetition to present a student-friendly introduction to conducting research in psychology. Drawing on more than 17 years of teaching experience, best-selling author Dawn M. McBride covers topics with step-by-step explanations to help students understand the full process of designing, conducting, and presenting a research study. Early chapters introduce important concepts for developing research ideas, subject sampling, ethics, and data collection; more detailed coverage of these topics is included in More About chapters to provide instructors with flexibility in their teaching. Concepts and skills relevant to more than one stage of the research process are covered in multiple contexts, providing repeated exposure to the topics students often struggle with but that are the most important in gaining research skills.
