**Coding for Entrepreneurs** Thompson Carter, 2026-02-12 You don't need a technical co-founder to validate your idea. You need the right skills. Many promising startups stall because founders wait for a developer, outsource too early, or build the wrong thing first. This book shows how entrepreneurs can learn just enough coding to build a functional minimum viable product (MVP), test assumptions, and gain real traction without becoming full-time engineers. Coding for Entrepreneurs is a practical, execution-focused guide to using code as a business tool, not a career change.

**What You'll Learn in This Book:**

- What entrepreneurs actually need to know about coding
- Choosing the right tech stack for fast MVP development
- Building simple but functional web applications
- Creating prototypes users can actually test
- Knowing when to code yourself and when to outsource
- Avoiding overengineering and premature scaling
- Communicating effectively with developers later on

The emphasis is on speed, clarity, and validation, not technical perfection.

**Who This Book Is For:** This guide is ideal for startup founders and solo entrepreneurs, non-technical founders with product ideas, indie hackers, and bootstrappers.

**Business professionals launching digital products.** Anyone who wants to build before raising money. No prior programming experience is required.

**Why Learning to Code Changes the Startup Game:** Coding gives entrepreneurs independence from early technical bottlenecks, faster iteration and learning, better product intuition, and stronger conversations with engineers and investors. This book teaches how to use coding strategically without getting lost in technical details.
