with a step class because you're afraid that being a chocoholic who loves comfort food will affect your body mass index and you want to avoid yo-yo dieting you'll find all these common words in The Canadian Oxford Dictionary. An added feature of this dictionary is its encyclopedic element. It includes short biographies of over 800 Canadians ranging from Elvis Stojko, Celine Dion, and Jean Beliveau to Nellie McClung, Lester B. Pearson, and Kim Campbell. It also contains entries on 5,000 individuals and mythical figures of international significance and almost 6,000 place names, more than 1,200 of them Canadian. Indeed, all Canadian towns with a population of 5,000 or more are featured, and their entries not only explain the origin of the place name but also include the population based on the 1996 census. With the publication of The Canadian Oxford Dictionary, Oxford University Press adds another work to its highly respected range of dictionaries, and Canadians finally have a dictionary that truly reflects their nation.

**The Sunday-school Times**, 1887 **Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c**, 1850 "The" Illustrated London News, 1860 **Dictionary of Civil Engineering** Jean-Paul Kurtz, 2007-05-08. I am pleased to present a work which marks a milestone in the history of public works and more precisely in that of permanent structures: a comprehensive dictionary of Civil Engineering terms. Since the beginning of time, Man has always tried to find a means to clear the obstacles which nature erected to displace him. With the first tree trunk thrown across a river, man sought to improve the crossing structure. After the invention of the wheel and to satisfy his thirst for conquest, Roman ways and comfort aqueducts, man built bridges that became a prerogative necessity to move quickly. Thus, Man started to build wooden and masonry works. With the passing centuries, the builders became masters in the art of building masonry works. Then came the Industrial Revolution and the advent of the steel 1864, which was closely followed by the invention of the reinforced concrete 1855. The need for railways and improving the road network inspired great works of crossing such as viaducts and tunnels. The boom of the railway network and the development of the car required the construction of an increasing number of new structures. This phenomenon continues today with hundreds of structures built each year throughout the world.
