Whether you are a nursing student or a new or experienced nurse, this on-the-spot study and clinical guide is your ticket to ensuring your charting is timely, accurate, and watertight. Let the experts walk you through up-to-date best practices for nursing documentation with NEW and updated, fully illustrated content in quick-read, bulleted format. NEW discussion of the necessary documentation process outside of charting: informed consent, advanced directives, medication reconciliation. Easy to retain guidance on using the electronic medical records, electronic health records, EMR, EHR documentation systems, and required charting and documentation practices. Easy to read, easy to remember content that provides helpful charting examples demonstrating what to document in different patient situations while addressing the different styles of charting. Outlines the Do's and Don'ts of charting, a common sense approach that addresses a wide range of topics including: Documentation and the nursing process, assessment, nursing diagnosis, planning, care outcomes, implementation, evaluation. Documenting the patient's health history and physical examination. The Joint Commission standards for assessment. Patient rights and safety. Care plan guidelines. Enhancing documentation. Avoiding legal problems. Documenting procedures. Documentation practices in a variety of settings: acute care, home healthcare, and long-term care. Documenting special situations: release of patient information after death, non-releasable information, searching for contraband, documenting inappropriate behavior. Special features include: Just the facts, a quick summary of each chapter's content. Advice from the experts, seasoned input on vital charting skills such as interviewing the patient, writing outcome standards, creating top-notch care plans. Nurse Joy and Jake, expert insights on the nursing process and problem-solving. That's a wrap, a review of the topics covered in that chapter.
