*Lost Classics* Michael Ondaatje, Michael Redhill, Esta Spalding, Linda Spalding, 2011-03-30. An Anchor Books Original. Seventy-four distinguished writers tell personal tales of books loved and lost, great books overlooked, under-read, out of print, stolen, scorned, extinct, or otherwise out of commission. Compiled by the editors of *Brick A Literary Magazine*, *Lost Classics* is a reader's delight, an intriguing and entertaining collection of eulogies for lost books. As the editors have written in a joint introduction to the book: "Being lovers of books, we've pulled a scent of these absences behind us, our whole reading lives, telling people about books that exist only on our own shelves or even just in our own memory. Anyone who has ever been changed by a book will find kindred spirits in the pages of *Lost Classics*. Each of the editors has contributed a lost book essay to this collection, including Michael Ondaatje on Sri Lankan filmmaker Tissa Abeysekera's *Bringing Tony Home*, a novella about a mutual era of childhood. Also included are Margaret Atwood on sex and death in the scandalous *Doctor Glas*, first published in Sweden in 1905; Russell Banks on the off-beat travelogue *Too Late to Turn Back* by Barbara Greene, the slightly ditzy cousin of Graham; Bill Richardson on a children's book for adults by Russell Hoban; Ronald Wright on William Golding's *Pincher Martin*; Caryl Phillips on Michael Mac Liammoir's account of his experiences on the set of Orson Welles's *Othello*; and much, much more.

**Symbolism** Florian Klaefer, Klaus Stierstorfer, Marlena Tronicke, 2022-10-03. Special Focus Omission edited by Patrick Gill. Throughout literary history and in many cultures, we encounter an astute use of conspicuous absences to conjure an imagined reality into a recipient's mind. The term omission, as used in the present study, then demarcates a common artistic phenomenon: a silence, blank, or absence introduced against the recipient's generic or experiential expectations, but which nonetheless frequently encapsulates the tenor of the work as a whole. Such omissions can be employed for their affective potential when emotions represented or evoked by the text are deemed to be beyond words. They can be employed to raise epistemological questions, as when an omission marks the limits of what can be known. Ethical questions can also be approached by means of omissions, as when a character's voice is omitted, for instance. Finally, omission always carries within it the potential to reflect on the media and genres on which it is brought to bear, as its efficacy depends

on the recipient's generic expectations omission is frequently characterized by a high degree of meta-discursiveness. This volume investigates the various strategies with which the phenomenon of omission is employed across a range of textual forms and in different cultures to conclusively argue for its status as a highly effective and near-universal form of artistic signification.

Scientific Cultures - Technological Challenges Klaus Benesch, Meike Zwingenberger, 2009. In 11 original essays highly reputed scholars from both the United States and Europe take a fresh look at the plurality of contemporary scientific cultures and their respective methodologies and discursive practices. While some investigate recent advancements in life and computer sciences, nanotechnologies, robotics, genetic coding, electronic communication and databases etc. and their repercussions in the social and political field, others discuss new approaches especially in the humanities that may help to bridge the gulf between the two cultures. C. P. Snow opens up new perspectives for cross-cultural fertilization. Each essay, if to varying degrees, also probes the regulatory, political and institutional mechanisms that determine both the success and public acceptance and reputation of specific scientific cultures, particularly with respect to scientific ethics and the frequently invoked moral obligation of scientists and researchers.
