

Cooling Theory Lectures Notes

Markus Hupfer and members of the team

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are peer-reviewed and give insights on problems for all of the cooling game, from the perspective of the faculty on the course, the faculty contribution to Cooling Theory and the needs of students and their (in)dependence of their learning styles. I also used several other sources for additional insights such as Part II course guide at Cambridge on Cooling Theory and Computational game by Professor John Koster, and the new paper series from a Cambridge team on Subgame-Perfect Equilibria in the game by Professor Tim Roughgarden. I also included some more recent work in 2023 course, Applied Math for the Free Market, and the new series of the series is based on Hugh Hupfer's course series, "Graph-Based Cooling".

All credits go to those who did my best.
